Wits 2015 Prospectors:

South African Urban Change Three Decades After Apartheid Anthony Lemon, Ronnie Donaldson, Gustav Visser, 2021-06-10 This book provides an analysis of South African urban change over the past three decades. It draws on a seminal text *Homes Apart* and revisits conclusions drawn in that collection that marked the final phases of urban apartheid. It highlights changes in demography, social as well as economic structure and their differential spatial expression across a range of urban sites in South Africa. The evidence presented in this book points to a very complex set of narratives in urban South Africa and one that cannot be reduced to a singular statement so the conclusions of the various investigations are in many ways open. As urban apartheid represented one clear outcome, its post-apartheid urban legacies varies greatly from city to city. As such, this book is a great resource to students and academics focused on urban change in South African cities since the demise of apartheid and scholars of urban policy making in South Africa and Southern urbanists generally. **Ore Deposits** Sophie Decrée, Laurence Robb, 2019-04-02 The latest knowledge on mineral ore genesis and the exploration of ore deposits. Global demand for metals has risen considerably over the past decade. Geologists are developing new approaches for studying ore deposits and discovering new sources. *Ore Deposits: Origin, Exploration and Exploitation* is a compilation of diverse case studies on new prospects in ore deposit geology including atypical examples of mineral deposits and new methods for ore exploration. Volume highlights include: Presentation of the latest research on a range of ore deposit types; Application of ore deposits to multiple areas of geology and geophysical exploration; Emphasis on diverse methods and tools for the study of ore deposits; Useful case studies for geologists in both academia and industry. *Ore Deposits: Origin, Exploration and Exploitation* is a valuable resource for economic geologists, mineralogists, petrologists, geochemists, mining engineers, research professionals and advanced students in relevant areas of academic study. Read an interview with the editors to find out more: <https://eos.org/editors-vox/developments-in-the-continuing-search-for-new-mineral-deposits>. **Making Africa Work** Greg Mills, Olusegun Obasanjo, Jeffrey Herbst, Dickie Davis, 2017-09-15 Sub-Saharan Africa faces three big inter-related challenges over the next generation. It will double its population to two billion by 2045. By then more than half of Africans will be living in cities. And this group of mostly young people will be connected with each other and the world through mobile devices. Properly harnessed and planned for, this is a tremendously positive force for change. Without economic growth and jobs, it could prove a political and social catastrophe. Old systems of patronage and of muddling through will no longer work because of these population increases. Instead, if leaders want to continue in power, they will have to promote economic growth in a more dynamic manner. *Making Africa Work* is a first-hand account and handbook of how to ensure growth beyond commodities and create jobs in the continent. *The History of Geophysics in Southern Africa* Johan H de Beer, 2016-01-25 Geophysics is a comparatively young science which only evolved as a distinct discipline during the 19th century. However, its phenomena like earthquakes, tsunamis, volcanic eruptions and lightning had been objects of fear, curiosity and speculation.

since ancient times In this book Johan de Beer and his research team reveal that geophysical activity in South Africa can be traced back to as early as 1488 This is a truly astonishing revelation which deserves to be firmly entrenched as part of the country's proud history The book also discusses the history and formation of South African geophysical institutions that made a huge and seldom acknowledged contribution to the technological development of southern Africa **The Phosphorus Factbook** Roland W. Scholz, Friedrich-Wilhelm Wellmer, Michael Mew, Gerald Steiner, 2025-09-12 This book provides a conceptual framework presenting a description and modelling of the regulating mechanisms of supply demand and supply demand dynamics sketches the most relevant classification systems of phosphorus deposits and outlines how they are related and how they should be improved to provide reliable comparable classification which is accepted by mining companies geological surveys science industry politicians and the public For anticipating how the phosphate reserves are increasing by increasing market values of phosphorus we use the Cumulative Availability Curve CAC approach The presented data for supply and demand dynamics reveal that given our current knowledge due to the abundance of phosphate rock sufficient phosphorus supply will be feasible for at least 1000 years The book stresses desiderata in knowledge and technology development particularly for the reduction of losses and thus a decrease of negative environmental impacts and an improvement of the use efficiency The book is designed as a fact book For all essential statements e.g. Mineral phosphorus will be available for at least a millenium rather than 300 years The total use efficiency of phosphorus is less than 10% the reader will find solid scientific references or calculations which can be used by researchers mineral industry and business actors policymakers governmental institutions NGOs etc **Overseas Economic Relations and Statehood in Europe, 1860s-1970s** Gerold Krozewski, 2023-04-06 Drawing on official archival and published sources this book explores how the formative history of the European nation state was embedded within economic globalization and associated with conceptions of the world overseas With a particular focus on France Germany Italy and Britain this research investigates how overseas relationships shaped state governance The argument departs from conventional histories by linking together the analysis of economic relationships and political cultures examining the ways in which state agency formed in different areas such as national economy building the organization of overseas raw material and food supplies labour migration and national identity Spanning over a century the book discusses the changing role of overseas colonies in European national development Once a means to complete economic liberalization colonies were then envisaged as tools of crisis management before in the mid twentieth century complementarities in imperial colonial economies shifted away from empire This volume covers neglected aspects of the transnational history of European nation states and is an ideal resource for students and researchers interested in the ties between Europe Africa and Asia as well as connections between political economic and social relations and their conceptualizations **The Heroes of John Buchan - Richard Hannay in 'The Thirty-Nine Steps' - Edward Leith in 'Sick Heart River' - Sandy Arbuthnot in 'The Courts of the Morning'** John Buchan, 2015-04-24 John Buchan

may hold the title of the man who invented spy adventure bringing Richard Hannay fully formed to readers in the early 19th century Hannay is just one of his masterful creations Edward Leithen and Sandy Arbuthnot would follow the Hannay novels and bring their own unique adventures to millions of enthralled readers

At the Earth's Core Edgar Rice Burroughs, 2015-11-04 I do not expect you to believe this story Nor could you wonder had you witnessed a recent experience of mine when in the armor of blissful and stupendous ignorance I gaily narrated the gist of it to a Fellow of the Royal Geological Society on the occasion of my last trip to London You would surely have thought that I had been detected in no less a heinous crime than the purloining of the Crown Jewels from the Tower or putting poison in the coffee of His Majesty the King The erudite gentleman in whom I confided congealed before I was half through it is all that saved him from exploding and my dreams of an Honorary Fellowship gold medals and a niche in the Hall of Fame faded into the thin cold air of his arctic atmosphere But I believe the story and so would you and so would the learned Fellow of the Royal Geological Society had you and he heard it from the lips of the man who told it to me Had you seen as I did the fire of truth in those gray eyes had you felt the ring of sincerity in that quiet voice had you realized the pathos of it all you too would believe You would not have needed the final ocular proof that I had the weird rhamphorhynchus like creature which he had brought back with him from the inner world I came upon him quite suddenly and no less unexpectedly upon the rim of the great Sahara Desert He was standing before a goat skin tent amidst a clump of date palms within a tiny oasis Close by was an Arab douar of some eight or ten tents I had come down from the north to hunt

lion My party consisted of a dozen children of the desert I was the only white man As we approached the little clump of verdure I saw the man come from his tent and with hand shaded eyes peer intently at us At sight of me he advanced rapidly to meet us A Wilderness of Rocks Melanie Schleeter McCalmont, 2015-08-31 Discover the University of Wisconsin collection of historic relief models or three dimensional maps The University of Wisconsin relief models were crafted from 1875 1943 at the dawn of the analytics age Relief models are an extremely effective visualization tool They help us intuitively understand big data sets and to create spatial awareness the knowledge of relationships between objects places and ourselves Each relief model is shown in beautiful color photography Learn their fascinating stories of expeditions and earthquakes mountains and museums bankruptcy and battlefields governments and glaciers **Colonial Cinema in Africa** Glenn Reynolds, 2015-06-08 In recent decades historians and film scholars have intensified their study of colonial cinema in Africa Yet the vastness of the continent the number of European powers involved and irregular record keeping has made uncovering the connections between imagery imperialism and indigenous peoples difficult This volume takes up the challenge tracing production and exhibition patterns to show how motion pictures were introduced on the continent during the Scramble for Africa and the subsequent era of consolidation The author describes how early actualities expeditionary footage ethnographic documentaries and missionary films were made in the African interior and examines the rise of mass black spectatorship While Africans in the first two decades of the 20th century were sidelined as cinema consumers because of colonial restrictions social and political changes in the subsequent interwar period wrought by large scale mining in southern Africa led to a rethinking of colonial film policy by missionaries mining concerns and colonial officials By World War II cinema had come to black Africa *The Financialisation of Power* Sarah Bracking, 2016-05-05 The financial crash of 2008 led people all over the world to ask how far financiers are in control of our lives To what extent does what they do with our money affect our everyday lives This book asks whether the crisis and subsequent use of public subsidies to help the international economy recover was a unique event or a symptom of a wider malaise where financiers have effectively usurped the power of governments and are running the political economy themselves The Financialisation of Power in Africa argues that growth is not always a good thing The development of more derivatives and faster financial exchanges are draining businesses of investment capital rather than serving to supply it applying financial logic does not save nature or protect biodiversity and other species This book outlines the concept of financialisation and how it has been used in various ways to explain the post 2008 crisis and global political economy There is a particular focus on these issues in reference to Africa which has a particular dependence on international money It takes the perspective of the modern state exploring how the political economy of development actually works in relation to African governance This book is of interest to students of international development and political economy and is a key source for policy makers interested in African studies and economic development *Mining Journal, Railway and Commercial Gazette* ,1969 *Falling Monuments, Reluctant Ruins*

Hilton Judin,2021-06-01 This edited collection looks at ruins and vacant buildings as part of South Africa's oppressive history of colonialism and apartheid and ways in which the past persists into the present *Falling Monuments Reluctant Ruins The Persistence of the Past in the Architecture of Apartheid* interrogates how in the era of decolonization post apartheid South Africa reckons with its past in order to shape its future Architects historians artists social anthropologists and urban planners seek answers in this book to complex and unsettling questions around heritage ruins and remembrance What do we do with hollow memorials and political architectural remnants Which should remain which forgotten and which dismantled Are these vacant buildings cemeteries statues and derelict grounds able to serve as inspiration in the fight against enduring racism and social neglect Should they become exemplary as spaces for restitution and justice The contributors examine the influence of public memory planning and activism on such anguished places of oppression resistance and defiance Their focus on visible markers in the landscape to interrogate our past will make readers reconsider these spaces looking at their landscape and history anew Through a series of 14 empirically grounded chapters and 48 images the contributors seek to understand how architecture contests or subverts these persistent conditions in order to promote social justice land reclamation and urban rehabilitation The decades following the dismantling of apartheid are surveyed in light of contemporary heritage projects where building ruins and abandoned spaces are challenged and renegotiated across the country to become sites of protest inspiration and anger This ground breaking collection is an important resource for professionals academics and activists working in South Africa today

Mining and Minerals Engineering,1967 **The First Hollywood Sound Shorts, 1926-1931** Edwin M. Bradley,2015-06-14 This study of early sound shorts begins with an explanation of the development of sound motion pictures in Hollywood by such influential companies as Warner Bros and Fox with an emphasis on short subjects leading up to the first few months when all of the major studios were capable of producing them The next chapters discuss the impact on other mass entertainments the development of audible news reels and other non fiction shorts as well as the origins of animated sound subjects A comprehensive list of pre 1932 American made shorts completes the volume
