## **Wits Guide 2015 For Undergraduatr Application:**

Understanding the Higher Education Market in Africa Emmanuel Mogaji, Felix Maringe, Robert Ebo Hinson, 2020-03-06

This book offers theoretical and practical insights into the marketing of higher education in Africa. It explores the key players, challenges and policies affecting higher education across the continent, their marketing strategies and the students' selection process. While acknowledging the vast size of the continent, this book aims to provide an understanding of the dynamics of higher education in Africa. This book recognises the private and government involvement in higher education provision and students and staff as stakeholders in the marketisation process. Strategic efforts are directed by universities to attract prospective students. This book further addresses issues such as the responses of higher education sectors to the notion of markets and marketing, consumerism and competition in higher education in Africa, conceptions of the commodification of higher education in Africa and the dominance of Western epistemologies and their influence in transforming higher education sectors. Students as consumers in increasingly marketised higher education sectors in Africa are also discussed. Though primarily for marketing students and academic researchers, the book's feature of blended theoretical and practical knowledge means that it will also be of interest to marketing practitioners and university managers. **The Oxford**

**Handbook of the Archaeology and Anthropology of Rock Art** Bruno David, Ian J. McNiven, 2018-10-17. Rock art is one of the most visible and geographically widespread of cultural expressions and it spans much of the period of our species' existence. Rock art also provides rare and often unique insights into the minds and visually creative capacities of our ancestors and how selected rock outcrops with distinctive images were used to construct symbolic landscapes and shape worldviews. Equally important, rock art is often central to the expression of and engagement with spiritual entities and forces and in all these dimensions it signals the diversity of cultural practices across place and through time. Over the past 150 years, archaeologists have studied ancient arts on rock surfaces both out in the open and within caves and rock shelters and social anthropologists have revealed how people today use art in their daily lives. The Oxford Handbook of the Archaeology and Anthropology of Rock Art showcases examples of such research from around the world and across a broad range of cultural contexts, giving a sense of the art's regional variability, its antiquity and how it is meaningful to people in the recent past and today, including how we have ourselves tended to make sense of the art of others replete with our own preconceptions. It reviews past, present and emerging theoretical approaches to rock art investigation and presents new, cutting-edge methods of rock art analysis for the student and professional researcher alike. Medium Education in the Internationalised University Emma Dafouz, Ute Smit, 2019-08-12. This book is the first to offer a conceptual framework of English medium education that can be used across different international higher education (HE) contexts. Making the case for the pressing need for an overarching conceptualisation, the authors discuss

from a theoretical point of view the recently introduced ROAD MAPPING framework for English Medium Education in Multilingual University Settings EMEMUS Drawing on current research and examples from a variety of settings the book makes a strong case for the applicability of the framework in two important directions as a methodological tool for researching educational practices and as an analytical guide to examine policies and teacher education programmes
