## Women in Combat: History Examples

A tradition of women in combat broke down during the times of military actions. WWII is full of examples where females were able to assume dramatic roles they could never imagine during their peaceful life. The war always comes with a pressing need for human resources. WWII came with many jobs varying from nurses to soldiers on the front line. Official reports and registers show that thousands of American women were eager to serve in the army. Some of them got a chance to fly military planes and air crafts while the Soviet Union put its females in combat roles due to a crucial lack of male fighters. However, as soon as the war is over, old laws and obligations come back to force.

In 1984, The Congress of the United States mandated that only 2% of all military forces should be represented by women. However, the situation has changed drastically from that time. Women's military role has increased up to 15% making their military role more contributing and defining ever since. Leon Panetta announced the end of such an approach. The announcement barred females from positions in armed forces after the expansion was observed.

On the other hand, the world has many examples showing Canada and Israel where women have full access to a military scene as well as some European countries. When revising the idea of gender equality, some Communist countries have also spread the ideology and propaganda of women in combat. It should also be noted that the rules of modern warfare have been changed. There are no front lines and direct combats letting women make their contribution in the field of military developments, technology, and support.

**Women in Combat** Lorry M. Fenner, Marie E. deYoung, 2001-08-09 Women have been actively involved the United States military for more than fifty years but the ban on their participation in combat remains a hotly debated issue In this provocative book Lorry M Fenner an active duty Air Force intelligence officer calls for opening all aspects of military service to women Marie deYoung a former Army chaplain argues that keeping women out of combat is in the best interests of both sexes and crucial to the effectiveness of the military as a whole Fenner bases her argument for inclusion of women on the idea that democracies require all citizens to compete in public endeavor and share in civic obligation She contends that historically reasons for banning women from combat have been culturally biased She argues that membership in a combat force should be based on capability judged against appropriate standards Moreover she maintains that excluding women

hampers the diversity and adaptability that by necessity will characterize the armed forces in the twenty first century In contrast deYoung declares that the different physical fitness standards for men and women would in combat lower morale for both sexes and put women at risk of casualty Further she contends that women have neither the physical or emotional strength to endure the overall brutality of the combat experience She also asserts that calls for lifting the combat ban are politically motivated and are inconsistent with the principles of American democracy and the mission of national defense With each author responding to the views of the other their exchange offers a valuable synthesis of the issues surrounding a longstanding debate among policymakers military personnel and scholars of both military history and women s studies

Kaufman,Kristen P. Williams,2010 Women everywhere have long struggled for recognition as equal productive members of society worthy of taking part in the political process These struggles become even more pronounced in times of conflict and war when the symbolism and myths of womanhood are used to stoke nationalistic ideas about the survival of the state Yet for all the rhetoric that takes place in their name it s men who generally make decisions regarding war *Women and War* examines how women respond to situations of conflict Drawing on both traditional and feminist international relations theory it explores the roles that women play before during and after a conflict how they spur and respond to nationalist and social movements and how conceptions of gender are deeply intertwined with ideas about citizenship and the state As Kaufman and Williams show women do more than respond to conflict situations they are active agents in their own right shaping political and historical processes Their conclusions encourage us to rethink the prevalent assumptions of international relations history and feminist scholarship and theory **Essays on Twentieth-Century History** Michael Adas,American Historical Association,2010-05-28 Probing the paradoxes of the long twentieth century Unprecedented human opportunity and deprivation to the rise of the United States as a hegemon **Muslim Women in War and Crisis** Faegheh Shirazi,2010-06-15 In the Eyes of many Westerners Muslim women are hidden behind a veil of negative stereotypes that portray them as either oppressed subservient wives and daughters or more recently as potential terrorists Yet many Muslim women defy these stereotypes by taking active roles in their families and communities and working to create a more just society This book introduces eighteen Muslim women activists from the United States and Canada who have worked in fields from social services to marital counseling to political advocacy in order to further social justice within the Muslim community

and in the greater North American society      *Gendered Tropes in War Photography* Marta Zarzycka, 2016-09-13

Photographic stills of women appearing in both press coverage and relief campaigns have long been central to the documentation of war and civil conflict. Images of non-Western women in particular regularly function as symbols of the misery and hopelessness of the oppressed. Featured on the front pages of newspapers and in NGO reports, they inform public understandings of war and peace victims and perpetrators but within a discourse that often obscures social and political subjectivities. Uniquely, this book deconstructs in a systematic, gender-sensitive way the repetitive circulation of certain images of war conflict and state violence in order to scrutinize the role of photographic tropes in the globalized visual sphere. Zarzycka builds on feminist theories of representations of war to explore how the concepts of femininity and war secure each other's intelligibility in photographic practices. This book examines the complex connections between photographic tropes and the individuals and communities they represent in order to rethink the medium of photography as a discursive and political practice. This book interrogates both the structure and transmission of contemporary encounters with war violence and conflict. It will appeal to advanced students and scholars of gender studies, visual studies, media studies, photography theory, cultural anthropology, cultural studies, and trauma and memory studies.

**Women Writing War** Katharina von Hammerstein, Barbara Kosta, Julie Shoults, 2018-08-06

Recent scholarship has broadened definitions of war and shifted from the narrow focus on battles and power struggles to include narratives of the homefront and private sphere. To expand scholarship on textual representations of war means to shed light on the multiple theaters of war and on the many voices who contributed to, were affected by, and/or critiqued German war efforts. Engaged women writers and artists commented on their nation's imperial and colonial ambitions and the events of the tumultuous beginning of the twentieth century. In an interdisciplinary investigation, this volume explores select female-authored German language texts focusing on German colonial wars and World War I and the discourses that promoted or critiqued their premises. They examine how colonial conflicts contributed to a persistent atmosphere of *Kriegsbegeisterung* (war enthusiasm) that eventually culminated in the outbreak of World War I or a *Kriegskritik* (criticism of war) that resisted it. The span from German colonialism to World War I brings these explosive periods into relief and challenges readers to think about the intersection of nationalism, violence, and gender and about the historical continuities and disruptions that shape such events.
