TOPIC: Key Switches, Wiring, and Terminal Identification

1/91 - T5

INFORMATION

All agricultural tractors manufactured since 1965 and all industrial straddle mount industrial tractors manufactured from 1965 to 1978 can be serviced with the five-position key switch described in this bulletin. The four-position key switch previously specified for diesel less Thermostart and gasoline tractors will not be supplied after present stock is depleted.

This switch has five positions: "Off," "Accessory," "On," "Heat/Ether" and "Start." The key is rotated clockwise for all positions. The "Off," "Accessory" and "On" positions have detents. The key is rotated against light spring pressure for the "Heat/Ether" position and against heavier spring pressure for the "Start" position. When released, the key returns to the "On" position (Figure 1). The terminal end of this switch is dipped in black neoprene sealant. See Service Journal 6-88, page 4, bulletin T1.
