## **Within The Four Seas The Dialogue Of East And West:**

*Within the Four Seas* Joseph Needham, 1969      *Within the Four Seas* Joseph Needham, 2013-11-05 First published in 1969 Contains some of Joseph Needham's most significant essays lectures and broadcasts on the history of Chinese science technology and culture Also included are some more personal thoughts stimulated by his own travels and experiences in China including a number of poems The book discusses the valuable social and intellectual influences which have flowed to Europe from South as well as East Asia and suggests that the events of the twentieth century were a natural development of Chinese history not a deviation from it      **George Yeo: Selected Musings** George Yong-boon Yeo, 2024-05-03 Over sessions which lasted two to three hours each time every week for half a year George Yeo met and mused over a wide range of topics with writer Woon Tai Ho and research assistant Keith Yap Speaking from notes he began with himself and his hope for Singapore and then spanned over a wide range of subjects from the importance of human diversity and Singapore's reflection within itself of the world to history politics economics philosophy taijigong and religion He gives his views on India China ASEAN Europe the US and other parts of the world and how Singapore's history and destiny are connected to all of them The style is conversational and anecdotal George Yeo Musings is exactly that musings Some themes recur throughout the book which reflect his view of life But there is no grand theory He does not expect all of his reflections to be of interest to everyone but he hopes that everyone will find something of interest This special edition offers a selection of Musings from the three series      **Imperial China, 900-1800** F. W. Mote, 2003-11-15 In this history of China for the 900 year span of the late imperial period Mote highlights the personal characteristics of the rulers and dynasties and probes the cultural theme of Chinese adaptations to recurrent alien rule Generational events personalities and the spirit of the age combine to yield a comprehensive history of the civilization      **All Under Heaven** John H. Berthrong, 1994-03-22 This book is a study of comparative philosophy and theology The themes are the critical issues arising from the modern interpretation of Confucian doctrine as they confront the Christian beliefs of the nineteenth and twentieth centuries      **Drugs and Popular Culture** Paul Manning, 2013-01-11 The use of illegal drugs is so common that a number of commentators now refer to the normalisation of drug consumption It is surprising then that to date very little academic work has explored drug use as part of contemporary popular culture This collection of readings will apply an innovatory multi disciplinary approach to this theme combining some of the most recent research on the normalisation thesis with fresh work on the relationship between drug use and popular culture In drawing upon criminological sociological and cultural studies approaches this book will make an important contribution to the newly emerging field positioned at the intersection of these disciplines The particular focus of the book is upon drug consumption as popular culture It aims to provide an accessible collection of chapters and readings that will explore drug use in popular culture in a way that is relevant to undergraduates and postgraduates studying a variety of courses including criminology sociology media studies health care and social work      *The Dialectics of Ecology* John

Bellamy Foster, 2024-04 Today the fate of the earth as a home for humanity is in question and yet contends John Bellamy Foster the reunification of humanity and the earth remains possible if we are prepared to make revolutionary changes As with his prior books *The Dialectics of Ecology* is grounded in the contention that we are now faced with a concrete choice between ecological socialism and capitalist exterminism and rooted in insights drawn from the classical historical materialist tradition In this latest work Foster explores the complex theoretical debates that have arisen historically with respect to the dialectics of nature and society He then goes on to examine the current contradictions associated with the confrontation between capitalist extractivism and the financialization of nature on the one hand and the radical challenges to these represented by emergent visions of ecological civilization and planned degrowth on the other Eastern Influences on Western Philosophy A. L. Macfie, 2019-08-05 This Reader explores the extent of Oriental influence on European thought primarily in the period of the Enlightenment and the nineteenth century period of doubt and scepticism that followed it It is the first Reader to bring together in one place a series of specific historical and textual studies of Oriental influence upon European thinkers **Learning From China?** Bernhard Glaeser, 2013-09-05 First published in 1987 this volume was written to shed some light upon the nature and environmental consequences and wider relevance of development strategies in the Peoples Republic of China It covers industrialisation food production energy use and landscape and settlement planning The Chinese autocentred strategy is assessed from both the developmental and the environmental viewpoints Decision making processes and the opportunities to implement environmental policy in other parts of the developing world are analysed and the volume concludes with the view that benefits to other countries are likely to arise out of increased co operation and exchange with China although the Chinese model is by no means a panacea All students and researchers interested in either environmental or developmental issues will find this book to be a substantial and enlightening contribution to literature Functions and Uses of Disciplinary Histories Loren Graham, Wolf Lepenies, P. Weingart, 2012-12-06 Edward Gibbon s allegation at the beginning of his *Essay on the Study of Literature* 1764 that the history of empires is that of the miseries of humankind whereas the history of the sciences is that of their splendour and happiness has for a long time been accepted by professional scientists and by historians of science alike For its practitioner the history of a discipline displayed above all the always difficult but finally rewarding approach to a truth which was incorporated in the discipline in its actual form Looking back it was only too easy to distinguish those who erred and heretics in the field from the few forerunners of true science On the one hand the traditional history of science was told as a story of hero and hero worship on the other hand it was paradoxically enough the constant attempt to remind the scientist whom he should better forget It is not surprising at all therefore that the traditional history of science was a field of only minor interest for the practitioner of a distinct scientific discipline or specialty and at the same time a hardly challenging task for the professional historian Nietzsche had already described the historian of science as someone who arrives late after harvest

time it is somebody who is only a tolerated guest at the thanksgiving dinner of the scientific community A Peace History of India Klaus Schlichtmann, 2016-09-01 This book is a great contribution to Peace Research It places India in the world as a worthy player in international relations from ancient times The selection of four of the most significant historical peaks over two millennia the Ashoka era the Pala era the Orientalist era and the Gandhi era shows the uniqueness of India's peaceful history relevant not only for herself but for the whole of humankind To the point that in present times her engagement is destined to contribute to the urgent long awaited transformation of the United Nations Organization J S

**De-Westernizing Communication Research** Georgette Wang, 2010-12-14 The rise of postmodern theories and pluralist thinking has paved the way for multicultural approaches to communication studies and now is the time for decentralization de Westernization and differentiation This trend is reflected in the increasing number of communication journals with a national or regional focus Alongside this proliferation of research output from outside of the mainstream West there is a growing discontent with communication theories being Westerncentric Compared with earlier works that questioned the need to distinguish between the Western and the non Western and to build Asian communication theories there seems to be greater assertiveness and determination in searching for and developing theoretical frameworks and paradigms that take consideration of and therefore are more relevant to the cultural context in which research is accomplished This path breaking book moves beyond critiquing Westerncentrism in media and communication studies by examining where Eurocentrism has come from how is it reflected in the study of media and communication what the barriers and solutions to de centralizing the production of theories are and what is called for in order to establish Asian communication theories

**Culture, Economic Growth, and Interstate Power Shift** Steve Chan, 2024-02-08 How has China's and East Asia's impressive economic growth been influenced by their Confucian heritage And how does economic growth affect interstate competition

**A Culture of Growth** Joel Mokyr, 2018-06-12 Why Enlightenment culture sparked the Industrial Revolution During the late eighteenth century innovations in Europe triggered the Industrial Revolution and the sustained economic progress that spread across the globe While much has been made of the details of the Industrial Revolution what remains a mystery is why it took place at all Why did this revolution begin in the West and not elsewhere and why did it continue leading to today's unprecedented prosperity In this groundbreaking book celebrated economic historian Joel Mokyr argues that a culture of growth specific to early modern Europe and the European Enlightenment laid the foundations for the scientific advances and pioneering inventions that would instigate explosive technological and economic development Bringing together economics the history of science and technology and models of cultural evolution Mokyr demonstrates that culture the beliefs values and preferences in society that are capable of changing behavior was a deciding factor in societal transformations Mokyr looks at the period 1500-1700 to show that a politically fragmented Europe fostered a competitive market for ideas and a willingness to investigate the secrets of nature At the same time a

transnational community of brilliant thinkers known as the Republic of Letters freely circulated and distributed ideas and writings This political fragmentation and the supportive intellectual environment explain how the Industrial Revolution happened in Europe but not China despite similar levels of technology and intellectual activity In Europe heterodox and creative thinkers could find sanctuary in other countries and spread their thinking across borders In contrast China's version of the Enlightenment remained controlled by the ruling elite Combining ideas from economics and cultural evolution A Culture of Growth provides startling reasons for why the foundations of our modern economy were laid in the mere two centuries between Columbus and Newton     Wei Yüan and China's Rediscovery of the Maritime World Jane Kate

Leonard, 2020-05-11 This book revises earlier views of statecraft reformer Wei Yuan and of Chinese foreign relations during the nineteenth century Approaching the history of nineteenth century China from the perspective of Southeast Asian history the author demonstrates the interaction from China in times onwards between China and the Southern ocean or Nan yang
