Suspended God Maeve Louise Heaney, 2022-03-24 Heaney traces the hidden history of music s presence in Christian thought including its often unrecognized influence on key figures such as von Balthasar Barth and Bonhoeffer She uses Lonergan s theological framework to explore musical composition as a theological act showing why when and how music is a useful symbolic form The book introduces eleven ground breaking theologians and each chapter offers an entry point into the thought of the theologian being presented through an original piece of music which can be found on the companion website <https://bloomsbury.pub/suspendedgod> Heaney argues that music is a universally important means of making sense of life with which theology needs to engage as a means of expression and of development Musical composition is presented as an appropriate and even necessary form of doing theology in its quest to engage with the past mediate truth to the present and tradition it into the future

J. Leary, 2014-03-27 The post classical compilation known to modern scholarship as the Latin Anthology contains a collection of a hundred riddles each consisting of three hexameters and preceded by a lemma It would seem from the preface to this collection that they were composed extempore at a dinner to celebrate the Roman Saturnalia The work was to have a defining influence on later collections of riddles yet its title probably the Aenigmata has been debated and almost nothing is known about its author questions have even been asked about his name Symphosius and date 4th 5th century AD In this edition of the riddles the Introduction discusses the work's title and its author's identity as well as his name and date it considers his national origin North African and intellectual background a professional grammarian and argues that he was not Christian as has been suggested It examines the Saturnalian background to the work setting it in its sociological context and discusses the author's literary debts especially to Martial The Introduction also explores the author's ordering and arrangement of the riddles discusses his literary style Latinity and metre and comments briefly on his Nachleben It concludes with a survey of the textual tradition The commentary on each riddle includes a translation general notes on the object it describes with reference as necessary to museums and artefacts and discussion of how it fits into the ordering of the collection of variant readings and with suitable illustration of literary stylistic and metrical considerations Other areas such as history and mythology are also covered where relevant *A Companion to John Scottus Eriugena* Adrian Guio, 2019-10-21 John Scottus Eriugena d ca 877 is regarded as the most important philosopher and theologian in the Latin West from the death of Boethius until the thirteenth century He incorporated his understanding of Latin sources Ambrose Augustine

Calvino's Combinational Creativity Elizabeth Scheiber, 2016-02-08 Calvino's Combinational Creativity examines the various ways combinatory processes influence the work of the Italian author Italo Calvino Comprising chapters by six literary scholars the volume asserts that the Ligurian writer's creativity often stems from his contemplation of literature even as it investigates the intersection of his work with poets writers and literary movements Each chapter explores a different aspect of Calvino's creativity Natalie Berkman examines Calvino as a reader of Ariosto and provides an analysis of mathematical combinations inspired by Vladimir Propp in *Il castello dei destini incrociati* Discussing the poetic and scientific influence of the Argentine writer Julio Cortázar on Calvino Sara Ceroni then presents *Palomar* as a modernist work of epiphanies This is followed by two chapters investigating different influences on *Cosmicomics* Elio Baldi demonstrates how Calvino's collection of stories appropriates various conventions of the science fiction genre while Elizabeth Scheiber provides a close reading of two tales to show how Calvino uses science as a metaphor to comment on the poetics of Italian authors Gadda D'Annunzio Ungaretti and Montale Cecilia Benaglia then proposes Calvino as a reader of Gadda who served not only as an aesthetic influence but also as an epistemological one Finally juxtaposing Calvino with his contemporary Umberto Eco Sebastiano Bazzichetto examines the two authors' use of figures of speech as ways of constructing labyrinths Calvino's Combinational Creativity takes Calvino studies in new directions as it rethinks how the author's work can be classified and delves into the sources of his inspiration

The Catholic Church and the World Religions Gavin D'Costa, 2011-04-28 There is no single standard textbook that outlines the official Roman Catholic theological position in relation to other religions which then explicates this orientation theologically and phenomenologically in relation to the four main religions of the world and the flowering of new religious movements in the west The present project will cover this serious gap in the literature After outlining the teaching of Vatican II and the magisterium since then chapter one each subsequent chapter will be divided equally between a an exposition of the history and features of the religion or movement being studied and b a serious theological analysis of these features showing how these religions do have elements in common as well as how they differ in fundamental ways from Catholicism

The 1949 Geneva Conventions Andrew Clapham, Paola Gaeta, Marco Sassòli, 2015-10-15 The four Geneva Conventions

adopted in 1949 remain the fundamental basis of contemporary international humanitarian law. They protect the wounded and sick on the battlefield, those wounded, sick, or shipwrecked at sea, prisoners of war, and civilians in time of war. However, since they were adopted, warfare has changed considerably. In this groundbreaking commentary, over sixty international law experts investigate the application of the Geneva Conventions and explain how they should be interpreted today. It places the Conventions in the light of the developing obligations imposed by international law on states, armed groups, and individuals, most notably through international human rights law and international criminal law. The context in which the Conventions are to be applied and interpreted has changed considerably since they were first written. The borderline between international and non-international armed conflicts is not as clear-cut as was once thought and is complicated further by the use of armed force mandated by the United Nations and the complex, mixed, and transnational nature of certain non-international armed conflicts. The influence of other developing branches of international law, such as human rights law and refugee law, has been considerable. The development of international criminal law has breathed new life into multiple provisions of the Geneva Conventions. This commentary adopts a thematic approach to provide detailed analysis of each key issue dealt with by the Conventions, taking into account both judicial decisions and state practice. Cross-cutting chapters on issues such as transnational conflicts and the geographical scope of the Conventions also give readers a full understanding of the meaning of the Geneva Conventions in their contemporary context. Prepared under the auspices of the Geneva Academy of International Humanitarian Law and Human Rights, this commentary on four of the most important treaties in international law is unmissable for anyone working in or studying situations of armed conflicts.
