**15****The Theory of Evolution****Reinforcement and Study Guide****Section 15.1 Natural Selection and the Evidence for Evolution**

In your textbook, read about Charles Darwin and natural selection.

For each statement, write **true** or **false**.

- \_\_\_\_\_ 1. H.M.S. *Beagle*, upon which Charles Darwin served as naturalist, set sail on a collecting and mapping expedition in 1831.
- \_\_\_\_\_ 2. The environments that Darwin studied exhibited little biological diversity.
- \_\_\_\_\_ 3. By careful anatomical study, Darwin found that the many species of plants and animals on the Galapagos Islands were unique and bore no relation to species seen in other parts of the world.
- \_\_\_\_\_ 4. The tortoises of the Galapagos Islands are among the largest on Earth.
- \_\_\_\_\_ 5. After returning to England, Darwin studied his collections for 10 years.
- \_\_\_\_\_ 6. Darwin named the process by which evolution proceeds *artificial selection*.

You are a naturalist who traveled to the Galapagos Islands. Below are excerpts from field notes. Next to each set of notes, write a heading. Use these choices: Overproduction of Offspring, Natural Selection, Struggle for Existence, Variation.

7.

**Field Notes**

Female finches found on the Galapagos Islands lay enormous numbers of eggs.

\_\_\_\_\_

8.

**Field Notes**

These finches compete for a particular species of insect that inhabits the small holes found in tree bark.

\_\_\_\_\_

9.

**Field Notes**

Some finches' beaks are long, some are short. The finches with long beaks are better adapted to remove the insects from the bark.

\_\_\_\_\_

10.

**Field Notes**

The finches with the long beaks survive and produce greater numbers of offspring with long beaks.

**The Evolution of American Educational Technology** Paul Saettler, 2004-03-01 The primary purpose of this book is to trace the theoretical methodological foundations of American educational technology It must be emphasized that this work is essentially as history of the process of educational technology rather than of products in the form of devices or media Although media have played an important role in educational technology the reader should not lose sight of the central process which characterizes and underlies the true historical meaning and function of educational technology Moreover the assumption is made that all current theory methodology and practice rests upon the heritage of the past Indeed a common problem in the field has been the failure in many instances to take adequate account of past history in planning for the present or the future A related purpose of this book is to provide a selective survey of research in educational technology as it relates to the American public schools Such research reviews are not intended to be comprehensive but were included because of their historical importance and their relevance in understanding the process of educational technology
