What are the Effects of Cultural Traditions on the Education of women? (The Study of the Tumbuka People of Zambia) Christine Phiri Mushibwe, 2014-02-01. Cultural traditions do adversely affect the education of many people in the world. Women are unfortunately the most affected victims of their culture. This book demonstrates how cultural traditions can militate against the education of women in Zambia, with a focus on the Tumbuka tribe. The evidence at hand demonstrates that patrilineal groupings are strongholds of the patriarchal predisposition and patriarchal attitudes, and cultural traditions do not recognize women as equal partners with men. The Tumbuka women's experiences and beliefs reflect socio-cultural traditional norms that tend to limit gender equality and compel women to accept and justify male domination at the expense of their own status and to regard consequent inequalities as normal. Evidence demonstrates that the initiation rites, an active institution for girls of pubescent age, interfere more with the school-based education of girls. The women are active social agents as well as passive learners who will not allow the girls they are coaching to question the purpose for some traditional practices that are oppressive and directly cause

them to fail to complete their schooling successfully The Practice of Prophecy Li Ming Dennis Lum,2018-03-26 The charisma of prophecy is found throughout the history of the global Pentecostal movement Within the movement prophecy is seen as the communication of an inspired spontaneous revelation bringing edification to the faith community Despite its prevalence academic research has mostly focused on the biblical theological aspect neglecting the actual contemporary practice This book addresses this gap with a study on the practice of prophecy within the Assemblies of God of Singapore The book investigates the nature purpose and significance of the phenomenon It also identifies theological variables that are correlated with its practice and explicates these relationships The investigation employs the empirical theological method of Johannes van der Ven utilizing both a qualitative and a quantitative study The results provide a rich description of the actual reception delivery and judging of prophecy Significant findings include relationships between prophecy and courage love personality types prayer types and evangelism *Introduction to Addictive Behaviors* Dennis L. Thombs,Cynthia J. Osborn,2019-05-15 The book has two primary goals The first is to challenge and strengthen the reader s understanding of addiction by exploring how others in the field have come to know it We hope that this will enable the reader to create a clear and logically consistent perspective on addiction The second goal is to show the reader how theory and research are important to both the prevention and the treatment of substance abuse This information should provide the reader with an array of strategies for addressing substance abuse problems and help make him or her an effective practitioner
