Therapist's Guide to Substance Abuse Intervention Sharon L. Johnson, 2003-04-28 Author of AP's bestselling Therapist's Guide to Clinical Intervention now turns her attention to substance abuse intervention. The book will follow a similar format to her previous book, presenting information in easy-to-read outline form with relevant forms, patient questionnaires, checklists, business documents, etc. Part I discusses the social impact of substance abuse and provides a general overview of the physiological and psychological characteristics of abuse, DSM-IV definition of abuse, and classifications of the varying types of drugs. Part II is the main section of the book and covers assessment, different stages of abuse recovery, and treatment choices. Coverage includes the discussion of myriad self-help choices, e.g., AA group therapy, brief therapy, and more. Discussion will also include making a determination of treatment as inpatient or outpatient and issues relevant to special populations: teenagers, geriatrics, comorbidity patients, etc. Part III presents skill-building resources. Part IV covers prevention, quality assurance, and also includes a glossary. Outlines treatment goals and objectives. Outlines for assessing special circumstances. Offers skill-building resources to supplement treatment. *Theory and Practice of Addiction Counseling* Pamela S. Lassiter, John R. Culbreth, 2017-03-07 *Theory and Practice of Addiction Counseling* by Pamela S. Lassiter and John R. Culbreth brings together contemporary theories of addiction and helps readers connect those theories to practice using a common multicultural case study. Theories covered include motivational interviewing, moral theory, developmental theory, cognitive-behavioral theories, attachment theory, and sociological theory. Each chapter focuses on a single theory, describing its basic tenets, philosophical underpinnings, key concepts, and strengths and weaknesses. Each chapter also shows how practitioners using the theory would respond to a common case study, giving readers the opportunity to compare how the different theoretical approaches are applied to client situations. A final chapter discusses approaches to relapse prevention. **Textbook of Addiction Treatment** Nady el-Guebaly, Giuseppe Carrà, Marc Galanter, Alexander M. Baldacchino, 2020-11-03 Addiction is increasingly being recognized as a major global public health issue, and an ever-growing number of medical specialties, psychological and social science training programs, and professional associations are including addiction as part of their training and continuing education curricula. Sharing the experience and wisdom of more than 260 leading experts in the field and promoted by the International Society of Addiction Medicine, it compared and contrasted clinical practices in the field of addiction medicine on the basis of neurobiological similarities as well as epidemiological and socio-cultural differences. Building on the success of this inaugural edition and taking into account the formal and informal comments received, as well as an assessment of current need, this textbook presents general updated information while retaining the most requested sections of the first edition, as demonstrated by the number of chapter downloads.
