Dark Side of the Tune: Popular Music and Violence Professor Bruce Johnson, Professor Martin Cloonan, 2013-01-28 Written against the academically dominant but simplistic romanticization of popular music as a positive force this book focuses on the dark side of the subject It is a pioneering examination of the ways in which popular music has been deployed in association with violence ranging from what appears to be an incidental relationship to one in which music is explicitly applied as an instrument of violence A preliminary overview of the physiological and cognitive foundations of sounding hearing which are distinctive within the sensorium discloses in particular their potential for organic and psychic violence The study then elaborates working definitions of key terms including the vexed idea of the popular for the purposes of this investigation and provides a historical survey of examples of the nexus between music and violence from pre Biblical times to the late nineteenth century The second half of the book concentrates on the modern era marked in this case by the emergence of technologies by which music can be electronically augmented generated and disseminated beginning with the advent of sound recording from the 1870s and proceeding to audio internet and other contemporary audio technologies Johnson and Cloonan argue that these technologies have transformed the potential of music to mediate cultural confrontations from the local to the global particularly through violence The authors present a taxonomy of case histories in the connection between popular music and violence through increasingly intense forms of that relationship culminating in the topical examples of music and torture including those in Bosnia Darfur and by US forces in Iraq and Guantamo Bay This however is not simply a succession of data but an argumentative synthesis Thus the final section debates the implications of

this nexus both for popular music studies itself and also in cultural policy and regulation the ethics of citizenship and arguments about human rights

Peasants in Power Philip Verwimp, 2013-06-03 This book shows how Rwanda's development model and the organisation of genocide are two sides of the same coin In the absence of mineral resources the elite organised and managed the labour of peasant producers as efficient as possible In order to stay in power and benefit from it the presidential clan chose a development model that would not change the political status quo When the latter was threatened the elite invoked the preservation of group welfare of the Hutu called for Hutu unity and solidarity and relied on the great mass *rubanda nyamwinshi* for the execution of the genocide A strategy as simple as it is horrific The genocide can be regarded as the ultimate act of self preservation through annihilation under the veil of self defense Why did tens of thousands of ordinary people massacred tens of thousands other ordinary people in Rwanda in 1994 What has agricultural policy and rural ideology to do with it What was the role of the Akazu the presidential clan around president Habyarimana Did the civil war cause the genocide And what insights can a political economy perspective offer Based on more than ten years of research and engaging with competing and complementary arguments of authors such as Peter Uvin Alison Des Forges Scott Strauss Ren Lemarchand Filip Reyntjens Mahmood Mamdani and Andr Guichaoua the author blends economics politics and agrarian studies to provide a new way of understanding the nexus between development and genocide in Rwanda Students and practitioners of development as well as everyone interested in the causes of violent conflict and genocide in Africa and around the world will find this book compelling to read
