*The Other Enlightenment* Matthew Sharpe, 2023-02-16 Challenging widespread misunderstandings this book shows that central to key enlightenment texts was the practice of estranging taken for granted prejudices by adopting the perspective of Others The enlightenment s key progenitors led by Montesquieu Voltaire and Diderot were more empiricist than rationalist and more critical than utopian Moreover each was an artful exponent of the proto postmodernist practice of asking Europeans to review what they considered unquestionable through the eyes of Others Persians women Tahitians Londoners natives and na ves the blind and even imaginary extra terrestrials This book aims to show that this self estrangement as a means to gain critical distance from one s taken for granted assumptions was central to the enlightenment and remains vital for critical and constructive sociopolitical thinking today
