Automated Essay Scoring Beata Beigman Klebanov, Nitin Madnani, 2022-05-31 This book discusses the state of the art of automated essay scoring its challenges and its potential One of the earliest applications of artificial intelligence to language data along with machine translation and speech recognition automated essay scoring has evolved to become both a revenue generating industry and a vast field of research with many subfields and connections to other NLP tasks In this book we review the

developments in this field against the backdrop of Elias Page's seminal 1966 paper titled *The Imminence of Grading Essays by Computer*. Part 1 establishes what automated essay scoring is about why it exists where the technology stands and what are some of the main issues. In Part 2 the book presents guided exercises to illustrate how one would go about building and evaluating a simple automated scoring system while Part 3 offers readers a survey of the literature on different types of scoring models the aspects of essay quality studied in prior research and the implementation and evaluation of a scoring engine. Part 4 offers a broader view of the field inclusive of some neighboring areas and Part 5 closes with summary and discussion. This book grew out of a week long course on automated evaluation of language production at the North American Summer School for Logic Language and Information NASSLLI attended by advanced undergraduates and early stage graduate students from a variety of disciplines. Teachers of natural language processing in particular will find that the book offers a useful foundation for a supplemental module on automated scoring. Professionals and students in linguistics applied linguistics educational technology and other related disciplines will also find the material here useful. Writing and Power Candace Mitchell, 2015-12-03 This book offers a much needed alternative to the more traditional texts used to teach writing instruction. Grounded in history the book clarifies changing theoretical and practical approaches to teaching writing critically assessing each approach in relation to the social and political movements of the day both within and beyond the university. The author takes us inside the real world of writing instruction not only from the viewpoint of instructor but as seen through the eyes of students struggling to make sense of the expectations of writing class. Mitchell emphasizes that writing entails far more than putting words to paper and delves into contextually variable culturally defined expectations that include multiple linguistic forms both oral and written highlighting the complexity of writing's while engaging the reader in lively academic debates about language and society. *Changing Practices for the L2 Writing Classroom* Nigel A. Caplan, Ann Johns, 2019-04-26 This volume was written to make the case for changes in second language writing practices away from the five paragraph essay and toward purposeful meaningful writing instruction. As the volume editors say If you have already rejected the five paragraph essay we offer validation and classroom tested alternatives. If you are new to teaching L2 writing we introduce critical issues you will need to consider as you plan your lessons and as you consider review the textbooks and handbooks that continue to promote the teaching of the five paragraph essay. If you need ammunition to present to colleagues and administrators we present theory research and pedagogy that will benefit students from elementary to graduate school. If you are skeptical about our claims we invite you to review the research presented here and consider what your students could do beyond writing a five paragraph essay if you enacted these changes in practice. Part 1 discusses what the five paragraph essay is not it is not a very old established form of writing it is not a genre and it is not universal. Part 2 looks at writing practices to show the essay's ineffectiveness in elementary schools secondary schools first year writing classes university writing courses undergraduate discipline courses and graduate school. Part 3 looks beyond the

classroom at testing At the end of each chapter the authors all well known in the field of second language writing suggest changes to teaching practices based on their theoretical approach and classroom experience The book closes by reviewing some of the major questions raised in the book by exploring which questions have been left unanswered and by offering suggestions for teachers who want to move away from the five paragraph essay An assignment sequence for genre aware writing instruction is included
