#### SYNOPSIS:

This is the story of a Scottish wolfhound called Snarf and his owner, Hekja. When Vikings raid Hekja's village she and Snarf are captured by Freydis Eriksdottir, daughter of the infamous Erik the Red, the founder of the Viking Greenland colony, and half sister to Leif Erikson, usually credited with 'discovering' America. Hekja becomes a thrall, a slave, in Greenland, but fiery determination wins the admiration of her mistress. When Freydis leads an expedition to Vinland in what is now North America, Hekja and Snarf go with her. This page-turning story is set against an historical backdrop and the book is both fascinating and historically informative.

Ages 10-14

**Analyzing Teaching** Angelika Kullberg,Åke Ingerman,Ference Marton,2024-01-24 Using illustrative teaching case studies this book demonstrates how teaching informed by a learning theory specifically Variation theory can equip teachers to facilitate possibilities for students learning in effective and powerful ways For a long period of time teaching has been black boxed in favour of other explanations of why students learn or not such as motivation and social interaction A large amount of research on teaching and learning not the least made using Variation theory has shown that students often need to experience the same aspects of the focused content or capability in order to learn indicating that relationships between teaching and learning are not unique or even qualitatively different for every individual and every situation This perspective on the relationship between teaching and learning emphasizes content specific aspects and in that sense structural components of teaching while other aspects of schooling such as social interaction and general well being recede into the background The authors argue for the importance of this in the direct development of teachers independent collective professional knowledge about teaching and the leverage this gives for developing student learning They introduce theoretical tools to help teachers to increase the probability that teaching focusing a specific content or capability is predictive of students learning of that specific content or capability while decreasing contextual dependency without assuming that teaching and learning have a one to one relationship Intended for teachers graduate students in education teacher educators student teachers and researchers this book shows that while there is no simple equation between teaching and learning there are general though content specific aspects of teaching that can be systematically planned and analyzed and used to improve the quality of student learning The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

**Teaching and Learning Culture** Mads Jakob Kirkebæk,Xiang-Yun Du,Annie Aarup Jensen,2013-11-19 This book is based on educational research conducted by researchers from the Department of Learning and Philosophy and the Confucius Institute for Innovation and Learning at Aalborg University Empirically it reports on different approaches to teaching and learning of culture including a student centered task based problem based learning PBL approach a digital technology supported approach and more It also reports on how when teaching and learning culture teachers professional identity and the informal teaching and learning environment impact the teaching and learning of culture in different educational settings from primary school to university A central theme in the book is the power of context The studies illustrate in multiple ways and from different angles that culture is not taught in a vacuum or learned in isolation but may be influenced by many factors

both inside and outside the classroom at the same time culture also influences the context of the learning The context may be invisible and hide itself as tacit knowledge or embedded values or it may be very visible and present itself as a fixed curriculum or an established tradition No matter what forms and shapes the context takes the studies in this book strongly indicate that it is essential to be aware of the power of context in teaching and learning culture in order to understand it and negotiate it This book suggests that teachers should not try to limit or avoid contextual influences but instead should explore how the context may be integrated into and used constructively in the teaching and learning of culture This allowance of context in the classroom will allow for teachers students subjects and contexts to enter into a dialogue and negotiation of meaning that will enrich each other and achieve the established goal acquisition of cultural awareness and intercultural understanding

**Handbook of Pre-Modern Nordic Memory Studies** Jürg Glauser, Pernille Hermann, Stephen A. Mitchell, 2018-11-19 In recent years the field of Memory Studies has emerged as a key approach in the Humanities and Social Sciences and has increasingly shown its ability to open new windows on Nordic Studies as well The entries in this book document the work to date of this approach on the pre modern Nordic world mainly the Viking Age and the Middle Ages but including as well both earlier and later periods Given that Memory Studies is an ever expanding critical strategy the approximately eighty contributors in this volume also discuss the potential for future research in this area Topics covered range from texts to performance to visual and other aspects of material culture all approached from within an interdisciplinary framework International specialists coming from such relevant fields as archaeology mythology history of religion folklore history law art literature philology language and mediality offer assessments on the relevance of Memory Studies to their disciplines and show it at work in case studies Finally this handbook demonstrates the various levels of culture where memory had a critical impact in the pre modern North and how deeply embedded the role of memory is in the material itself

**Algorithmic Reading Comprehension** Rahul Anand, Kamlesh Chauhan, 2018-10-10 Reading comprehension solving is a skill It is different from literature in the sense that it is independent of interpretation There is no subjectivity in RC questions The art of solving can be learnt by mastering the topic at three levels The ability to read to eliminate options and to build mistake patterns to learn from them These three levels lie at the core of Algorithmic Reading Comprehension an approach to build expertise in RC solving This approach was created by my team and me over the past 6 years of training thousands of students for the Reading comprehension section for CAT GMAT and other aptitude based entrance examinations The book deals with two major aspects of reading Central Idea and Contextual Word Learning It moves on to discuss the meaning of different question types asked across exams and provides elimination frameworks to

tackle tricky options Finally students get many passages arranged in levels and then in a practice chapter to practice and to learn from Welcome to the world of flawless RC learning
