Thieves Of State Why Corruption Threatens Global Security:

Thieves of State: Why Corruption Threatens Global Security Sarah Chayes, 2015-01-19 Winner of the 2015 Los Angeles Times Book Prize for Current Interest I can't imagine a more important book for our time Sebastian Junger The world is blowing up Every day a new blaze seems to ignite the bloody implosion of Iraq and Syria the East West standoff in Ukraine abducted schoolgirls in Nigeria Is there some thread tying these frightening international security crises together In a riveting account that weaves history with fast moving reportage and insider accounts from the Afghanistan war Sarah Chayes identifies the unexpected link corruption Since the late 1990s corruption has reached such an extent that some governments resemble glorified criminal gangs bent solely on their own enrichment These kleptocrats drive indignant populations to extremes ranging from revolution to militant puritanical religion Chayes plunges readers into some of the most venal environments on earth and examines what emerges Afghans returning to the Taliban Egyptians overthrowing the Mubarak government but also redesigning Al Qaeda and Nigerians embracing both radical evangelical Christianity and the Islamist terror group Boko Haram In many such places rigid moral codes are put forth as an antidote to the collapse of public integrity The pattern moreover pervades history Through deep archival research Chayes reveals that canonical political thinkers such as John Locke and Machiavelli as well as the great medieval Islamic statesman Nizam al Mulk all named corruption as a threat to the realm In a thrilling argument connecting the Protestant Reformation to the Arab Spring Thieves of State presents a powerful new way to understand global extremism And it makes a compelling case that we must confront corruption for it is a cause not a result of global instability Global Politics and Violent Non-state Actors Natasha Ezrow, 2017-03-13 Moving beyond terror groups to examine non state actors including warlords gangs and private security companies Violent Non State Actors Guides you through the core theories and concepts taking a multidisciplinary approach Examines different explanations for the emergence of violent non state actors as well as strategies for dealing with them Weaves in international case studies from groups including the Islamic State Los Zetas Hamas and Al Qaeda as well as discussion questions further reading and definitions of key terms A must read for upper level undergraduate and postgraduate students in politics international relations security and terrorism studies **Organized Crime and Illicit Trade** Virginia Comolli, 2018-03-24 Unlike much of the existing literature on organised crime this book is less focused on the problem per se as it is on understanding its implications The latter especially in fragile and conflict regions amount to strategic challenges for the state Whereas most commentators would agree that criminal activities are harmful this volume addresses the questions of how for whom and controversially are they always harmful The volume is authored by experts with multi year experience analysing criminal and other non state activities They do so through different lenses conflict and security development and technology engaging academics practitioners and policy makers They offer a comprehensive integrated response to the challenges of transnational organised crime beyond traditional law enforcement driven

recommendations Rebel Law Frank Ledwidge, 2017-05-15 In most societies courts are where the rubber of government meets the road of the people If a state cannot settle disputes and ensure that its decisions are carried out for practical purposes it is no longer in charge This is why successful rebels put courts and justice at the top of their agendas Rebel Law examines this key weapon in the armory of insurgent groups ranging from the Ireland of the 1920s where the IRA sapped British power using Republican Tribunals to today s Caliphate of Law the Islamic State by way of Algeria in the 1950s and the Afghan Taliban Frank Ledwidge tells how insurgent courts bleed legitimacy from government decide cases and enforce judgments on the battlefield itself Astute counterinsurgents especially in ungoverned space can ensure that they retain the initiative The book describes French Turkish and British colonial judicial strategy and contrasts their experience with the chaos of more recent stabilization operations in Iraq and Afghanistan drawing lessons for contemporary counterinsurgents Rebel Law builds on his insights and shows that the courts themselves can be used as weapons for both sides in highly unconventional warfare Corruption and Global Justice Gillian Brock, 2023 Corruption is a pervasive problem for global justice Gillian Brock presents a much needed philosophical treatment She offers a new framework for allocating responsibility for corruption providing the analytical tools we need to tackle the global injustice that it causes **The Rotarian: March 2017** , **Unwinnable** Theo Farrell, 2017-09-07 Afghanistan was an unwinnable war As British and American troops withdraw discover this definitive account that explains why It could have been a very different story British forces could have successfully withdrawn from Afghanistan in 2002 having done the job they set out to do to defeat al Qaeda Instead in the years that followed Britain paid a devastating price for their presence in Helmand province So why did Britain enter and remain in an ill fated war Why did it fail so dramatically and was this expedition doomed from the beginning Drawing on unprecedented access to military reports government documents and senior individuals Professor Theo Farrell provides an extraordinary work of scholarship He explains the origins of the war details the campaigns over the subsequent years and examines the West s failure to understand the dynamics of local conflict and learn the lessons of history that ultimately led to devastating costs and repercussions still relevant today The best book so far on Britain s war in Afghanistan International Affairs Masterful irrefutable Farrell records all these military encounters with the irresistible pace of a novelist Sunday Times **Global Governance and the Emergence of Global Institutions for the 21st Century** Augusto Lopez-Claros, Arthur L. Dahl, Maja Groff, 2020-01-23 Is there any hope for those who despair at the state of the world and the powerlessness of governments to find a way forward Global Governance and the Emergence of Global Institutions for the 21st Century provides ambitious but reasonable proposals to give our globalized world the institutions of international governance necessary to address effectively the catastrophic risks facing humanity that are beyond national control The solution the authors suggest is to extend to the international level the same principles of sensible governance that exist in well governed national systems rule of law legislation in the common interest an executive branch to implement such

legislation and courts to enforce it The best protection is unified collective action based on shared values and respect for diversity to implement widely accepted international principles to advance universal human prosperity and well being This title is also available as Open Access

When Evil Strikes Sunday Bobai Agang,2016-06-22 Human hostility is not the narrative of a selected few Since the fall of the grandparents of the human family Adam and Eve all humans have continued to participate in the reality of evil Accordingly the question is no longer whether evil will strike but rather when evil strikes how should humans particularly Christians respond to it This book offers a relevant and effective theology and ethics for addressing the issue of Christian response to violence in Nigeria and beyond It situates the whole gamut of the reign of human hostility in its various manifestations self interest and greed for power deception and social injustices governmental official corruption terrorism and so on It encourages humans to take seriously both the fact of God creating humans good and the fall serving as the gateway of evil into the human race It recognizes the complexity of human problems Yet it offers possibility for just

peacemaking In spite of the horrific violence across the globe humans are still able to do tremendous good Thus the book recognizes the paradox of humanity humans are capable of doing tremendous good and equally capable of doing tremendous evil *The Palgrave Handbook of Indicators in Global Governance* Debora Valentina Malito,Gaby Umbach,Nehal

In *Corruption and Targeted Sanctions* Anton Moiseienko analyses the blacklisting of foreigners suspected of corruption and the prohibition of their entry into the sanctioning state from an international law perspective The implications of such actions have been on the international agenda for years and have gained particular prominence with the adoption by the US and Canada of the so called Magnitsky legislation in 2016 Across the Atlantic several European states followed suit The proliferation of anti corruption entry sanctions has prompted a reappraisal of applicable human rights safeguards along with issues of respect for official immunities and state sovereignty On the basis of a comprehensive review of relevant law and policy Anton Moiseienko identifies how targeted sanctions can ensure accountability for corruption while respecting international law **Home, Land, Security** Carla Power,2021-09-07 PULITZER PRIZE FINALIST A provocative and deeply

reported look into the emerging field of deradicalization Esquire told through the stories of former militants and the people working to bring them back into society What are the roots of radicalism Journalist Carla Power came to this question well before the January 6 2021 attack in Washington D C turned our country s attention to the problem of domestic radicalization Her entry point was a different wave of radical panic the way populists and pundits encouraged us to see the young people who joined ISIS or other terrorist organizations as simple monsters Power wanted to chip away at the stereotypes by focusing not on what these young people had done but why What drew them into militancy What visions of the world of home of land of security for themselves and the people they loved shifted their thinking toward radical beliefs And what visions of the world might bring them back to society Power begins her journey by talking to the mothers of young men who d joined ISIS in the UK and Canada from there she travels around the world in search of societies that are finding new and innovative ways to rehabilitate former extremists We meet an American judge who has staked his career on finding new ways to handle

terrorist suspects a Pakistani woman running a game changing school for former child soldiers a radicalized Somali American who learns through literature to see beyond his Manichean beliefs and a former neo Nazi who now helps disarm white supremacists Along the way Power gleans lessons that get her closer to answering the true question at the heart of her pursuit Can we find a way to live together An eye opening page turning investigation Home Land Security speaks to the rise of division and radicalization in all forms both at home and abroad In this richly reported and deeply human account Carla Power offers new ways to overcome the rising tides of extremism one human at a time **Security after Christendom**

John Heathershaw,2024-02-13 We live in the wealthiest and most heavily defended world in history so why do we feel so insecure In a secular world what does Christian theology have to say about this problem Security after Christendom combines practical examples social scientific research and an ecumenical approach to political theology to answer these questions It argues that Christendom was a plural phenomenon of imagined security communities of East and West whose unravelling continues to have implications for global politics today as dramatically illustrated by Russia s war in Ukraine While notions of a new Christendom are idolatrous and delusional secular imaginaries of national security or the liberal international order are both destructive and unstable True security radical inclusion nonviolent protection and abundant provision is an eschatological phenomenon inaugurated by Christ Security after Christendom is neither found in faithful government nor an exclusive church as polis approach but in relations of tension where the fallen powers are continuously confronted by prophetic practices A post Christendom community expresses its love for the world by seeking its security providentially limiting the disorders of the secular age and offering glimmers of a new earth **Conflict and Poverty in**

How to Make Love to a Despot: An Alternative Foreign Policy for the Twenty-First Century Stephen D. Krasner, 2020-04-07 After generations of foreign policy failures the United States can finally try to make the world safer not by relying on utopian goals but by working pragmatically with nondemocracies Since the end of the Second World War the United States has sunk hundreds of billions of dollars into foreign economies in the hope that its investments would help remake the world in its own image or at the very least make the world safe for democracy So far the returns have been disappointing to say the least Pushing for fair and free elections in undemocratic countries has added to the casualty count rather than taken away from it and trying to eliminate corruption entirely has precluded the elimination of some of the worst forms of corruption In the Middle East for example post 9 11 interventionist campaigns in Afghanistan and Iraq have proved to be long costly and worst of all ineffective Witnessing the failure of the utopian vision of a world full of market oriented democracies many observers both on the right and the left have begun to embrace a dystopian vision in which the United States can do nothing and save no one Accordingly calls to halt all assistance in undemocratic countries have grown louder But as Stephen D Krasner explains this cannot be an option weak and poorly governed states pose a threat to our stability In the era of nuclear weapons and biological warfare ignoring troubled countries puts millions of American lives at risk The greatest challenge for the United States now Krasner writes is to identify a set of policies that lie between the utopian vision that all countries can be like the United States and the dystopian view that nothing can be done He prescribes a pragmatic new course of policy Drawing on decades of research he makes the case for good enough governance governance that aims for better security better health limited economic growth and some protection of human rights To this end Krasner proposes working with despots to promote growth In a world where a single terrorist can kill thousands or even hundreds of thousands of people the United States does not have the luxury of idealistically ignoring the rest of the world But it cannot remake the world in its own image either Instead it must learn how to make love to despots

American State-Building in Afghanistan and Its

Regional Consequences Neamat Nojumi, 2016-03-03 The book calls for rethinking U S policy toward promoting Afghanistan as a regional economic hub in Southwest and Central Asia as it fits within the broader national security interest of the regional states It argues for defining Afghanistan within the U S national security interests in Southwest and Central Asia including Iran and offers critical strategic tools for Washington to support political openness and reforms that can balance China and Russia as well as more effectively manage Iran s regional behavior It links the U S policy approach in Southwest and Central Asia as the missing leg of Washington s East Asia policy The book defines the strategic interests of each of Afghanistan s neighboring states and key regional actors to explain why a rethinking of the U S role in Afghanistan can assist the emergence of a new regional order in Southwest and Central Asia which in turn can embolden a free market economy and a growing political openness superior to authoritarianism and Islamist militancy

Security in Africa Claire Metelits, 2016-10-12 Security in Africa A Critical Approach to Western Indicators of Threat questions the dominant Western narrative of security threats in Africa Based on an analysis traditional security studies and Western security policy it argues that commonly used indicators are based on mainstream security studies and provide only circumscribed analyses of threats to international security By assessing the origins of this traditional approach to security and problematizing failed states political instability Muslim populations and poverty among others it makes the case for a critical approach to framing security challenges in Africa
