Design series collection **The Art of Teaching Science** Jack Hassard, Michael Dias, 2013-07-04 The Art of Teaching Science emphasizes a humanistic experiential and constructivist approach to teaching and learning and integrates a wide variety of pedagogical tools. Becoming a science teacher is a creative process and this innovative textbook encourages students to construct ideas about science teaching through their interactions with peers, mentors and instructors and through hands-on minds-on activities designed to foster a collaborative thoughtful learning environment. This second edition retains key features such as inquiry-based activities and case studies throughout while simultaneously adding new material on the impact of standardized testing on inquiry-based science and explicit links to science teaching standards. Also included are expanded resources like a comprehensive website, a streamlined format and updated content making the experiential tools in the book even more useful for both pre and in-service science teachers.

Special Features Each chapter is organized into two sections: one that focuses on content and theme and one that contains a variety of strategies for extending chapter concepts outside the classroom. Case studies open each chapter to highlight real-world scenarios and to connect theory to teaching practice. Contains 33 Inquiry Activities that provide opportunities to explore the dimensions of science teaching and increase professional expertise. Problems and Extensions On the Web Resources and Readings guide students to further critical investigation of important concepts and topics. An extensive companion website includes even more student and instructor resources such as interviews with practicing science teachers, articles from the literature, chapter PowerPoint slides, syllabus helpers, additional case studies, activities and more. Bulletin of the United States Bureau of Labor Statistics, 1979 **The Creative Classroom** Keith Sawyer, 2019-08-09 The Creative Classroom presents an original compelling vision of schools where teaching and learning are centered on creativity. Drawing on the latest research as well as his studies of jazz and improvised theater, Sawyer describes curricula and classroom practices that will help educators get started with a new style of teaching: guided improvisation, where students are given freedom to explore within structures provided by the teacher. Readers will learn how to improve learning outcomes in all subjects from science and math to history and language arts by helping students master content area standards at the same time as they increase their creative potential. This book shows how teachers and school leaders can work together to overcome all too common barriers to creative teaching: leadership structure and culture and collaborate to transform schools into creative organizations.

Book Features Presents a research-based approach to teaching and learning for creativity. Identifies which learning outcomes support creativity and offers practical advice for how to teach for these outcomes. Shows how students learn content area knowledge while also learning to be creative with that knowledge. Describes principles and techniques that teachers can use in all subjects. Demonstrates that a combination of school structures, cultures, incentives and leadership are needed to support creative teaching and learning.

Resources in Education ,1998 **Transformative Education** Charlotte Graham,Philippe Longchamps,2022-08-03 Transformative Education aims decisively to transform the world of education and to nurture the next generation to become problem solvers and creative thinkers empowered with the necessary skills to make this world a better place It provides practical methods for sustainable integrative and active learning and investigates the why behind these proven and effective methods Discussing the different levels of subject integration in school from intradisciplinary to transdisciplinary teaching the authors analyse their potential holistic impact and knowledge retention effectiveness With a substantial section on the efficacious teaching of the increasingly indispensable field of critical thinking this book is built up first around a discourse of the intended methodology secondly it also includes a very practical mid section with direct and meticulously described project ideas for teachers to try out and finally a discussion and an analysis on what effects the proposed techniques might have and how teachers and students could be facilitated in their learning processes by school leaders and administrators This pioneering endeavour is an important text for education professionals globally as well as for the policy makers that regulate their work It may also be of interest to parents and to a wider society Additional digital resource content is available online and includes practical examples explanations and video to help support sustainable integrative and active learning

Culture in Education and Education in Culture Pernille Hviid,Mariann Märtsin,2019-11-18 In a world where the global engagement and international dialogue intensifies some areas of cultivated knowledge suffer from this dialogue and this has consequences for people and communities We propose education to be such a case The global dialogue in education tends to be restricted to and mediated by standardized measurements Such standards are meant to measure qualities of education and of student behavior and create the sought for condition for normative comparability and competition The obvious drawback is that cultural variability in local living as well as in education is rendered irrelevant Are there alternatives The book insists on maintaining the discussion about education on a global level but rather than moving towards homogenization and standardization of education the attention is drawn towards the potential for learning from creative fits and misfits between concrete local cultures institutional practices and global aims and standards of education This work brings together a group of educational and developmental researchers and scholars grappling to find culturally informed and sensitive modes of educating people and communities Case studies and examples from four geographical contexts are being discussed China Brazil Australia and Europe While being embedded in these local cultures the authors share a conceptual grounding in cultural developmental theorizing and a vision for a culturally informed globalized perspective on education As the theme of

the book is learning from each other the volume also includes commentaries from leading scholars in the field of cultural psychology and education

Research and Evidence-based Perspectives in Education Vana Chiou, Lotte Geunis, Oliver Holz, Nesrin Oruç Ertürk, Justyna Ratkowska-Pasikowska, Fiona Shelton, 2025
