Kida, 2009-09-25

Do you believe that you can consistently beat the stock market if you put in the effort that some people have extrasensory perception that crime and drug abuse in America are on the rise Many people hold one or more of these beliefs although research shows that they are not true And it's no wonder since advertising and some among the media promote these and many more questionable notions Although our creative problem solving capacity is what has made humans the successful species we are our brains are prone to certain kinds of errors that only careful critical thinking can correct This enlightening book discusses how to recognize faulty thinking and develop the necessary skills to become a more effective problem solver Author Thomas Kida identifies the six pack of problems that leads many of us unconsciously to accept false ideas We prefer stories to statistics We seek to confirm not to question our ideas We rarely appreciate the role of chance and coincidence in shaping events We sometimes misperceive the world around us We tend to oversimplify our thinking Our memories are often inaccurate Kida vividly illustrates these tendencies with numerous examples that demonstrate how easily we can be fooled into believing something that isn't true In a complex society where success in all facets of life often requires the ability to evaluate the validity of many conflicting claims the critical thinking skills examined in this informative and engaging book will prove invaluable **Don't Believe, What You Think** Werner Gross, 2025-05-01

This nonfiction book addresses the question of what relevance religiosity still holds today and where psychologists set up warning signs Religions today have a Janus faced character On the one hand they offer emotional support and assistance not only in crisis situations on the other hand suicide attacks are carried out in their name and under their guise sexual abuse of children has flourished or continues to do so Religions have lost their innocence worldwide But what exactly are religions How did they arise How have they changed over time What are the positive aspects of religions and what are the problematic ones Where do they help and where do they harm What distinguishes them and what do they have in common Contents Religions World explaining and meaning making systems that almost always consider themselves the one true eternal and ultimate explanation system They structure diffuse subjective inner truths and unstructured situations attempting to make the incomprehensible comprehensible Basic trust symbols ritual actions What are spiritual enlightenment experiences The

origin of all religions is fear emptiness meaninglessness and death Religions are good guides in the dark of night during the day it s better to rely on your own eyes About the author Werner Gross Dipl Psych psychotherapist supervisor and coach
