Lipinski, 2019-04-04 For René Magritte painting was a form of thinking Through paintings of ordinary objects rendered with illusionism Magritte probed the limits of our perception what we see and cannot see the nature of representation as a philosophical system for presenting ideas and explored perspective as a method of visual argumentation This book makes the claim that Magritte's painting is about vision and the act of viewing of perception itself and the process of how we see and experience things in the world including paintings as things **Luc Tuymans** Eva Meyer-Hermann, 2017-01-01 Belgian

painter Luc Tuymans b 1958 has over the course of his remarkable career created a distinctive vernacular and is widely credited with having contributed to the revival of painting in the 1990s This second volume in a planned three volume catalogue raisonné of Tuymans's paintings surveys nearly two hundred works featuring some of his most iconic canvases including from his seminal exhibition Mwana Kitoko Beautiful White Man 2000 derived from the fraught history of Belgian colonial rule of the Democratic Republic of the Congo and The Secretary of State 2005 a portrayal of Condoleezza Rice which conjures the history of racial and sexual prejudice in the United States Brilliant color reproductions of each painting from this period are accompanied by an illustrated chronology with archival images and installation views of the works in the volume This catalogue raisonné is a testament to Tuymans's persistent assertion of the relevance and importance of painting a conviction that he maintains even in today's digital world Painting, Photography, and the Digital Carl

The Pensive Image Hanneke Grootenboer, 2021-02-16 Grootenboer considers painting as a form of thinking in itself rather than a subject of philosophical and interpretive thought While the philosophical dimension of painting has long been discussed a clear case for painting as a form of visual thinking has yet to be made Traditionally vanitas still life paintings are considered to raise ontological issues while landscapes direct the mind toward introspection Grootenboer moves beyond these considerations to focus on what remains unspoken in painting the implicit and inexpressible that manifests in a quality she calls pensiveness Different from self aware or actively desiring images pensive images are speculative pointing beyond interpretation An alternative pictorial category pensive images stir us away from interpretation and toward a state of suspension where thinking through and with the image can start In fluid prose Grootenboer explores various modalities of visual thinking as the location where thought should be found as a refuge enabling reflection and as an encounter that provokes thought Through these considerations she demonstrates that artworks serve as models for thought as much as they act as instruments through which thinking can take place Starting from the premise that painting is itself a type of thinking The Pensive Image argues that art is capable of forming thoughts and shaping concepts in visual terms

PhotographyDigitalPainting Carl Robinson,2020-08-11 This anthology explores the connections between photography the digital and painting in contemporary art practices While there is much research being undertaken into the mediums under discussion as discrete concerns in the digital age there is little investigation into these in combination As photography the digital and painting frame the contemporary visual discourse a rigorous investigation into this relationship is much needed This book which continues the investigations begun with *PaintingDigitalPhotography* undertakes this by leading the research into questions of medium fluidity in contemporary visual art practices The contributors here are renowned artists senior academics theorists and younger researches contributing to the field of study Their essays address a wide range of interrelated topics including AI generation of digital imagery hyperreal photographic visions of the world the embodied experience of the painter and art practice that synthesises the three mediums amongst others This book will be of particular interest to scholars academics and researchers studying the associations of these mediums in the digital age *Rereading*

Abstract Expressionism, Clement Greenberg and the Cold War Daniel Neofetou,2021-09-23 Since the 1970s it has been argued that Abstract Expressionism was exhibited abroad by the post war US establishment in an attempt to culturally match and reinforce its newfound economic and military dominance The account of Abstract Expressionism developed by the American critic Clement Greenberg is often identified as central to these efforts However this book rereads Greenberg s account through Theodor Adorno and Maurice Merleau Ponty in order to contend that Greenberg s criticism in fact testifies to how Abstract Expressionism opposes the ends to which it was deployed With reference not only to the most famous artists of the movement but also female artists and artists of colour whom Greenberg himself neglected such as Joan Mitchell and Norman Lewis it is argued that far from reinforcing the capitalist status quo Abstract Expressionism engages corporeal and affective elements of experience dismissed or delegitimated by capitalism and promises a world that would do justice to them

What Drawing and Painting Really Mean Paul Crowther,2017-04-21 There are as many meanings to drawing and painting as there are cultural contexts for them to exist in But this is not the end of the story Drawings and paintings are made and in their making embody unique meanings that transform our perception of space time and sense of finitude These meanings have not been addressed by art history or visual studies hitherto and have only been considered indirectly by philosophers mainly in the phenomenological tradition If these intrinsic meanings are explained and further developed then the philosophy of art practice is significantly enhanced The present work accordingly is a phenomenology of how the gestural and digital creation of visual imagery generates self transformation through aesthetic space **Wonder in Contemporary Artistic**

Practice Christian Mieves,Irene Brown,2017-01-12 Wonder has an established link to the history and philosophy of science However there is little acknowledgement of the relationship between the visual arts and wonder This book presents a new perspective on this overlooked connection allowing a unique insight into the role of wonder in contemporary visual practice Artists curators and art theorists give accounts of their approach to wonder through the use of materials objects and ways of

exhibiting These accounts not only raise issues of a particular relevance to the way in which we encounter our reality today but ask to what extent artists utilize the function of wonder purposely in their work

Philosophy of Painting Jason Gaiger, 2022-10-20 What can philosophy reveal about painting and how might it deepen our understanding of this enduring art form *Philosophy of Painting* investigates the complex relationship between the painted surface and the depicted subject opening up current debates to address questions concerning the historicity of art Embracing contemporary painting it examines topics such as the post medium condition and the digital divide and the work of artists such as Lynette Yiadom Boakye Amy Sillman and Katharina Grosse Illustrated with 24 colour plates and highly readable throughout *Philosophy of Painting* provides a philosophically rigorous defence of the relevance of painting in the 21st century making an original contribution to the major ideas informing painting as an art Here is a clear and coherent account of the contemporary significance of painting and the pressures and possibilities that distinguish it from other art forms

Slow Painting Helen Westgeest, 2020-10-29 The abundance of images in our everyday lives and the speed at which they are consumed seems to have left us unable to critique them To rectify this situation artists such as Daniel Richter Jaune Quick to See Smith and Artur Zmijewski have demonstrated that painting is brilliantly equipped to produce slow images that enable encourage and reward reflection In this book Helen

Westgeest attempts to understand how various forms of slow painting can be used as tools to interrogate the visual mediations we encounter daily. Painting was expected to disappear in the digital age but through interactive painting performances and painting like manipulated photographs and videos Westgeest shows how photography video and new media art have themselves developed the visual strategies that painting had already mastered. Moreover the fleeting nature of digital mass media appears to have unlocked a desire for more physically stable and enduring pictures like paintings. Slow Painting charts how in a world where the constant quest for speed can leave us exhausted the appeal of this slower medium has only grown.

Expanded Painting Mark Titmarsh, 2017-08-24 The relevance of painting has been questioned many times over the last century by the arrival of photography installation art and digital technologies. But rather than accept the death of painting Mark Titmarsh traces a paradoxical interface between this art form and its opposing forces to define a new practice known as expanded painting giving the term historical context theoretical structure and an important place in contemporary practice. As the formal boundaries tumble the being of painting expands to become a kind of total art incorporating all other media including sculpture video and performance. Painting is considered from three different perspectives: ethnology art theory and ontology. From an ethnological point of view painting is one of any number of activities that takes place within a culture. In art theory terms painting is understood to produce objects of interest for humanities disciplines. Yet painting as a medium often challenges both its object and image status expanding and creating hybrid works between painting objects screen media and text. Ontologically painting is understood as an object of aesthetic discourse that in turn reflects historical states of being. Thus Expanded Painting delivers a new kind of saying a post aesthetic discourse that is attuned to an uncanny tension between the presence and absence of painting.
