

The Yin and Yang of American Culture

The Yin and Yang of American Culture: A Paradox by Eun Y. Kim is a perspective of the American way of life by a Korean American. Kim uses the yin and yang symbol to describe the positive and negatives of American culture and how it compares to Asian culture. Kim's exposure to American culture as a young child in Korea and immigrating to the United States while also being raised in a Korean household where Korean tradition was upheld provides a solid basis for her analysis.

I have chosen five of her yang statements for discussion which I believe I have experienced being a fourth generation American but also witnessing the truth to these statements during my travels to Asia as well as to Portugal. One of the biggest statements for Kim's yang is "Dreaming the Impossible". As children in America the majority of us are told to dream big. I was told as a child that I could be anything I wanted to be whether it was an astronaut, a veterinarian, or an entrepreneur. I have always dreamed of being a veterinarian, and I am slowly working towards my dream.

I have seen friends of mine achieve their dreams such as a close friend wanted to play football for the Air Force academy; he completed his four years at the academy playing football and went on to complete ten years as an Air Force officer. I have also seen the difference between the United States and Portugal, and how we encourage dreams and support them. My husband was born in Portugal and moved to the U. S. when he was two years old. His mom and dad worked hard to live "the American dream" which to them was owning your own house and providing for your family.

They did not push "dreams" other than that one on my husband or his brother. Despite this my husband created his dream; to fly planes. He cannot remember how old he was just that he was young, but he remembers taking a summer trip to Portugal to visit his grandparents, and he was invited into the cockpit of the airplane where he was allowed to sit in the captain's seat and was given a short tutorial, but ever since then his obsession with airplanes and flying took off. His parents may not have told him that he could do anything he dreamed of like my parents, but the American school system did.

"Dreaming the Impossible" also leads to "Flexible Systems, Flexible Roles". I am a great example of this. I finished high school and automatically rolled into college but after a year and a half of doing the bare minimum I decided that I wasn't serious about school at the moment and instead of wasting my time and money I would take some time off to decide what was important to me. Now about ten years later I am finally back to school full time while also finishing up my contract in the Navy. I am working full time and going to school full time with a flexible system and a semi-flexible role in both.

Nurturing a Daoist-Inspired Classroom Pedagogy Through the Contemplative Lenses of Teacher Diaries David McLachlan Jeffrey, 2024-08-01 The harmonizing influence of ancient Daoist philosophy is of much relevance to the world in which we live today and this is especially so in the field of global education Among the growing numbers of contemporary teachers and scholars who nurture Daoist wisdom in their classrooms this book takes the unique pathway of considering its applications through the contemplative lenses of teacher diaries Its South African born author has taught academic English for over three decades in Japan the Middle East and the People's Republic of China Since early childhood he has infused his fascination for Daoist wisdom with his enjoyment of writing diaries and in ways that derive insights into the compassionate frugal and humble foundations of Daoist inspired pedagogies within contemporary classroom environments This book presents Daoist wisdom in terms of it being the Supreme Ultimate of all ways It introduces the classical Daoist texts of the Laozi the Zhuangzi and the Liezi and shares a short historical overview of Daoism with its growing global influence As such it emphasizes that Daoist inspired pedagogies encourage a delicate balance between intuitive insights and intellectual analysis and in ways that are not antagonistic toward each other but which dance together as one In this regard the role of meditation during the undertaking of diaries is specifically highlighted concerning its propensity to bring one into the present moment pacify racing thoughts and transcend the ego It also shows how a meditative state of mind that accompanies the reading writing and analysis of the diary entries contributes to deeper self discernment along with unique intuitive insights related to oneself as a teacher and the classroom environment In addition this book describes how the Wordsmith Tools Program and the Book of Changes can be used as additional approaches to analyzing thought patterns within the diary entries and how

these also nurture inward contemplations and the intuitive insights that accompany them. Thereafter considerations based on the applications of core Daoist principles for classroom pedagogies are filtered through the contemplative lenses of teacher diaries. These principles are the unintentional integrity of de, the complementary duality of yin yang, the cosmic vitality of qi, the self-so-ness of ziran, the unforceful spontaneity of wuwei, and the unblemished purity of pu. This book illustrates through its diary lenses how these six Daoist principles can be nurtured in ways that contribute to a scholarliness that is grounded in an equal appreciation for the logical applications of intelligence along with the uniqueness of intuitive creativity which cannot be explicitly taught but which spontaneously arises from within the deep reservoirs of intuitive wisdom which exist within the true selves of everyone. In addition, this book shares pearls of Daoist wisdom for teachers from within the poetic chapters of the Laozi as well as within the amusingly enlightening stories in the Zhuangzi and the Liezi such that their ancient teachings can be applied to Daoist inspired pedagogies and nurtured in ways that unite the joyfulness and scholarly efficacy of both teaching and learning. It is shown how doing so enhances a sense of awe, wonder, openness, and contemplative oneness within the classroom environment, making it a happier, more contented, and more meaningful place for both teachers and students.
