Interdisciplinary/Multidisciplinary Woolf Ann Martin, Kathryn Holland, 2013-06-01 Edited collection from acclaimed

contemporary Woolf scholars linking inter and multidisciplinary scholarship to the intellectual and creative projects of Virginia Woolf and her modernist peers *A Museum Studies Approach to Heritage* Sheila Watson, Amy Jane Barnes, Katy Bunning, 2018-10-08 Heritage's revival as a respected academic subject has in part resulted from an increased awareness and understanding of indigenous rights and non Western philosophies and practices and a growing respect for the intangible. Heritage has thus far focused on management, tourism and the traditionally heritage minded disciplines such as archaeology, geography and social and cultural theory. Widening the scope of international heritage studies *A Museum Studies Approach to Heritage* explores heritage through new areas of knowledge including emotion and affect, the politics of dissent, migration and intercultural and participatory dimensions of heritage. Drawing on a range of disciplines and the best from established sources, the book includes writing not typically recognised as heritage but which nevertheless makes a valuable contribution to the debate about what heritage is, what it can do and how it works and for whom. Including heritage perspectives from beyond the professional sphere, the book serves as a reminder that heritage is not just an academic concern but a deeply felt and keenly valued public and private practice. This blending of traditional topics and emerging trends, established theory and concepts from other disciplines, offers readers international views of the past and future of this growing field. *A Museum Studies Approach to Heritage* offers a wider, more current and more inclusive overview of issues and practices in heritage and its intersection with museums. As such, the book will be essential reading for postgraduate students of heritage and museum studies. It will also be of great interest to academics, practitioners and anyone else who is interested in how we conceptualise and use the past. *Prosthetic Memory* Alison Landsberg, 2004 *Prosthetic Memory* argues that mass cultural forms such as cinema and television in fact contain the still unrealized potential for a progressive politics based on empathy for the historical experiences of others. The technologies of mass culture make it possible for anyone regardless of race, ethnicity or gender to share collective memories, to assimilate as deeply felt personal experiences historical events through which they themselves did not live. *Training the Young Actors of Theatre Ashbury* Gregory H. Simpson, 2025-04-14 When Gregory H. Simpson was hired to run the drama program at Ottawa private school Ashbury College, he brought with him a very simple premise: If you taught kids to think, there would be a revolution in education. That premise plus a few years more than a few scandalously unfiltered plays and a whole bunch of wonderful students would create the internationally acclaimed Theatre Ashbury. Mr Simpson demanded critical thought, intense work and commitment from those kids, and what he got was decades of showstopping educational and attention grabbing theatre. Not to mention a few stars among his alumni. Now Mr Simpson lays out his methodology: Theatre as Education. By giving his students the artistic freedom to explore difficult subjects, the rigor and the skills to depict them authentically and the highest standards to reach with their achievements, he taught his students and everyone around them a lot more than how to act. **Visualizing Atrocity** Valerie Hartouni, 2012-08-20 *Visualizing Atrocity* takes Hannah Arendt's provocative and polarizing account of the 1961 trial of Nazi

official Adolf Eichmann as its point of departure for reassessing some of the serviceable myths that have come to shape and limit our understanding both of the Nazi genocide and totalitarianism's broader constitutive and recurrent features. These myths are inextricably tied to and reinforced viscerally by the atrocity imagery that emerged with the liberation of the concentration camps at the war's end and played an especially important evidentiary role in the postwar trials of perpetrators. At the 1945 Nuremberg Tribunal particular practices of looking and seeing were first established with respect to these images that were later reinforced and institutionalized through Eichmann's trial in Jerusalem as simply part of the fabric of historical fact. They have come to constitute a certain visual rhetoric that now circumscribes the moral and political fields and powerfully assists in contemporary mythmaking about how we know genocide and what is permitted to count as such. In contrast, Arendt's claims about the banality of evil work to disrupt this visual rhetoric. More significantly still, they direct our attention well beyond the figure of Eichmann to a world organized now as then by practices and processes that while designed to sustain and even enhance life work as well to efface it. *The Yellow Star* Gerhard Schoenberger, 2004. Photograph page after page the Shoah unfolds as inexorable horror captured with resonance that remains unequalled.

Anti-Semitism Avner Falk, 2008-06-30. In the summer of 2006 the author received a message that read "Love the Nazis and KILL THE JEWS DEAD." And that was the trigger that launched internationally known scholar Falk into work on this book. Anti-Semitism has once again become a worldwide phenomenon growing largely during the last decade of the 20th century and the early years of the 21st. Among the spurs for this are the migration of Muslim populations and the ongoing Israeli-Arab wars. In this far-reaching and comprehensive volume, Falk delves deeply into the current events, history, and literature on anti-Semitism, integrating insights from psychology, sociology, anthropology, psychoanalysis, and political science. The result is an absorbing exploration of one of the oldest scourges of humanity, spotlighting the irrational and unconscious causes of anti-Semitism.

Christina Garsten,Monica Lindh De Montoya,2008-01-01 This book argues that transparency is a concept that has gained increasing currency and favour as an organizing principle and administrative goal in recent years Calls for transparency have been directed towards states markets corporations and national political processes as well as towards large institutions such as the European Union Focusing on empirically rich case studies the contributors explore the ideas and practices of transparency in different contexts encouraging a discussion of the many facets of the term and its strengths ambiguities and limitations They aim to shed light on the powerful global discourse and practices contained in the concept and to fill a gap in the literature since few attempts have until now been made to examine the actual content and practice of transparency Also

discussed are the complex negotiations through which it is determined what should be displayed and what should remain hidden the uses of power and control and the processes through which transparency is or is not achieved This analysis of the concepts models and metaphors that guide and shape organizational social and aesthetical practices today will provide a much needed contribution to the literature for academics researchers and students focusing on these areas
