

The World Turned Upside Down

The Second Low-carbohydrate Revolution

How the science of carbohydrate restriction arising from a rag-tag collection of popular diets defeated the powerful low-fat army and became the default approach to health.

The World Turned Upside Down The Second Low Carbohydrate Revolution:

Master Your Diabetes Mona Morstein, 2017-10-12 Dr Morstein draws from the best of conventional and integrative therapies to provide diabetic patients an easy to implement program to regain their health Robb Wolf author of *Wired to Eat* The evidence is clear We are in the midst of a worldwide diabetes epidemic In the United States alone one in three Americans is either diabetic 29 million patients or prediabetic 87 million patients costing an annual 242 billion in medical treatments In *Master Your Diabetes* naturopathic physician and diabetes expert Dr Mona Morstein shows how people with both type 1 and type 2 diabetes can gain and maintain excellent control of their blood sugar levels preventing and even reversing existing complications through education combined with medical support and encouragement This is the first comprehensive guide for patients caregivers and medical practitioners to demonstrate an integrative approach based on the eight essentials of treatment and prevention a low carb diet exercise good sleep stress management healing the gut detoxification supplementation and medications Topics covered include Important physical exams and lab work Conventional diets and non insulin medications Insulin Low carb diets and how they apply to different food groups Lifestyle factors including exercise stress management and the microbiome Diabetic supplementation Pediatric diabetes An indispensable resource *Master Your Diabetes* will empower readers to take control of their condition and continue living full active enjoyable and long lives

The World Turned Upside Down Richard Feinman, 2014-12-10 Nutrition in crisis Almost every day a new study shows that you are at risk for diabetes or cardiovascular disease or all cause mortality brought on by a newly appreciated toxin which turns out to be something that you just had for lunch excerpt from Chapter 16 Most of us no longer know what to eat or who to believe *The World Turned Upside Down* offers the perspective of a distinguished biochemist with a gift for making accessible the intricacies of biochemical pathways At the same time the book is unsparing in criticism of the nutritional establishment an establishment which it seems must inevitably be overthrown Scientifically accurate and entertaining this book paints a broad picture of the nutrition world the beauty of the underlying biochemistry and the embarrassing failure of the medical establishment the practical value in low carbohydrate diets and what's wrong with the constant reports that normal foods represent a threat rather than a source of pleasure

Low Sugar, So Simple Elviira Krebber, 2017-11-21 Get sugar off your plate for good with 100 recipes free of sugar and sugar pretenders that sabotage your diet and your health page 4 of cover

Nutrition in Crisis Richard David Feinman, 2019 Why Low Carb Should Be the Default Approach for Managing and Preventing Metabolic Syndrome and Other Chronic Diseases Almost every day it seems a new study is published that shows you are at risk for diabetes cardiovascular disease or all cause mortality due to something you've just eaten for lunch Many of us no longer know what to eat or who to believe In the *Nutrition Revolution* distinguished biochemist Richard Feinman PhD cuts through the noise explaining the intricacies of nutrition and human metabolism in accessible terms He lays out the tools you need to navigate the current confusion in the medical literature and

its increasingly bizarre reflection in the media At the same time The Nutrition Revolution offers an unsparing critique of the nutritional establishment which continues to demonize fat and refute the benefits of low carbohydrate and ketogenic diets all despite decades of evidence to the contrary

Feinman tells the story of the first low carbohydrate revolution fifteen years ago how it began what killed it and why a second revolution is now reaching a fever pitch He exposes the backhanded tactics of a regressive nutritional establishment that ignores good data and common sense and highlights the innovative work of those researchers who have broken rank

Entertaining informative and irreverent Feinman paints a broad picture of the nutrition world the beauty of the underlying biochemistry the embarrassing failures of the medical establishment the preeminence of low carbohydrate diets for weight loss diabetes other metabolic diseases and even cancer and what's wrong with the constant reports that common foods represent a threat rather than a source of pleasure

Eating Ourselves Sick Louise Stephen, 2017-01-31 Louise Stephen's powerful no holds barred demolition of Big Food dissects the profit motive that has filled our food supply with toxic oils and sugar and shows us how money is destroying our health

DAVID GILLESPIE Our diet has changed radically in the space of 100 years We have swapped home cooked food made with whole ingredients for processed food made from sugar seed oils and refined wheat Modern day food is cheap convenient and accessible but also hugely destructive to our health

Former business consultant Louise Stephen developed an autoimmune disease in her early thirties which led to renal failure and a kidney transplant As a middle class professional from a wealthy Western country she was perplexed as to how she had become so ill She started to investigate using her business and research skills to find out what she could about diet and how it relates to health What she uncovered will change the way you think about processed food frozen dinners breakfast cereals packaged snacks dips flavoured drinks bottled sauces and the industry that is profiting from the commodification and toxication of our food supply

Stephen shows us how Big Food is picking up where Big Tobacco left off employing skilful marketing to nudge us towards increasingly processed food while hoping we'll fail to notice the commensurate rise in obesity and decline in health

Stephen reveals how governments and peak health bodies are often powerless to intervene and even worse are sometimes complicit in convincing us to ditch our wholefood ingredients for factory made products This is not a diet book Meticulously researched and compellingly argued **Eating Ourselves Sick** shines a light on the powerful forces that stand between us and a healthy diet

Eat Rich, Live Long Ivor Cummins, 2018-02-27 You can take control of your health lose weight prevent disease and enjoy a long and healthy life The unique nutritional program outlined in **Eat Rich Live Long** is designed by experts to help you feel great while you eat delicious and satisfying foods Millions of people have gotten healthy through low carb plans over the years and a growing number have discovered the wonderful benefits of ketogenic keto nutrition Many are confused though about how low carb they should go Now **Eat Rich Live Long** reveals how mastering the low carb keto spectrum can maximize your weight loss and optimize your health for the long term In this book Ivor Cummins a world class engineer and technical master for a huge global tech corporation

and Dr Jeff Gerber a family doctor who is widely regarded as a global leader in low carb nutrition team up to present their unique perspectives from their extensive clinical medical and scientific research experience Together Cummins and Gerber crack the code that shows you how to eat the foods you enjoy lose weight and regain robust health They reveal how the nutritional experts have gotten it so wrong for so long by demonizing healthy natural fats in our diets and focusing on cholesterol and LDL as the villains In fact as the authors reveal by drawing on the latest peer reviewed global research eating a high percentage of natural fats a moderate amount of protein and a low percentage of carbs can help you lose weight prevent disease satisfy your appetite turn off your food cravings and live longer The heart of Eat Rich Live Long is the book s prescriptive program which includes a seven day eating plan a fourteen day eating plan and more than fifty gourmet quality low carb high fat recipes illustrated with gorgeous full color photographs for breakfasts lunches appetizers snacks dinners drinks and desserts Low carb never tasted so good Nutritional sacred cows are constantly being challenged in the media How much fat should we eat and which kinds of fats are best Which fats can contribute to diabetes heart disease and early mortality Does a high protein diet increase muscle mass and lead to vigorous health or can it promote aging cancer and early mortality Which vitamins and minerals should we be taking if any How do we change our metabolism so that our bodies burn fat instead of all the sugars we consume Does intermittent fasting really work Eat Rich Live Long lays out the truth based on the latest scientific research and it will change the way you look at eating Meanwhile you will lose weight and look and feel great
