Handbook of Cross-Cultural and Multicultural Personality Assessment Richard H. Dana, 2000-02 Throughout the world as in the United States psychologists are increasingly being called upon to evaluate clients whose backgrounds differ from their own It has long been recognized that standard personality and psychopathology assessment instruments carry cultural biases and in recent years efforts to correct these biases have accelerated The Handbook of Cross Cultural and Multicultural Personality Assessment brings together researchers and practitioners from 12 countries with diverse ethnic and racial identities and training to present state of the art knowledge about how best to minimize cultural biases in the assessment of personality and psychopathology They consider research methodology the design and construction of standard objective and projective tests the use of measures of acculturation racial identity and culture specific tests the social etiquette of service delivery and the interpretation of test data for clinical diagnosis Ranging widely through all the relevant issues they share a common collective vision of how culturally competent services should be delivered to clients The Handbook offers the first comprehensive view of a consistent approach to cultural competence in assessment a necessary precursor of effective intervention It will become an indispensable reference for all those whose practice or research involves individuals with different ethnic and racial identities

TEMAS (Tell-Me-A-Story) Assessment in Multicultural Societies Giuseppe Costantino, Richard H. Dana, Robert G. Malgady, 2020-08-26 Ethnic minority children now comprise over 75 percent of students in 100 of the largest cities in the United States However these students have not been given equal access to nor benefited from the contemporary mental health system as have their non minority peers TEMAS Tell Me A Story Assessment in Multicultural Societies examines the health mental care system in which professional service providers including psychologists labor to offer quality care for youth in the United States The authors ardently support the use of the TEMAS assessment instrument as a useful

tool for diagnosis of all youngsters particularly its use on the growing population of minority children and adolescents Part I presents a rationale and context for employing TEMAS Introductory chapters describe the mental health status of the population at risk as well as systems of care for youth where assessment and intervention are components Topics to follow highlight a history of positive TEMAS test reviews with the detail required by instructors for preparing dedicated TEMAS courses The volume thoroughly outlines cross cultural studies and illustrates case examples of European American Hispanic Latino Asian American and forensic studies TEMAS Tell Me A Story Assessment in Multicultural Societies brings practical insight to instructors who teach standard assessment courses clinicians counselors and school psychologists assessment specialists and administrators concerned with mental health services designed for children and adolescents *The Wonder of Their Voices* Alan Rosen, 2010-10-18 Over the last several decades video testimony with aging Holocaust survivors has brought these witnesses into the limelight Yet the success of these projects has made it seem that little survivor testimony took place in earlier years In truth thousands of survivors began to recount their experience at the earliest opportunity This book provides the first full length case study of early postwar Holocaust testimony focusing on David Boder s 1946 displaced persons interview project In July 1946 Boder a psychologist traveled to Europe to interview victims of the Holocaust who were in the Displaced Persons DP camps and what he called shelter houses During his nine weeks in Europe Boder carried out approximately 130 interviews in nine languages and recorded them on a wire recorder Likely the earliest audio recorded testimony of Holocaust survivors the interviews are valuable today for the spoken word that of the DP narrators and of Boder himself and also for the song sessions and religious services that Boder recorded Eighty sessions were eventually transcribed into English most of which were included in a self published manuscript Alan Rosen sets Boder s project in the context of the postwar response to displaced persons sketches the dramatic background of his previous life and work chronicles in detail the evolving process of interviewing both Jewish and non Jewish DPs and examines from several angles the implications for the history of Holocaust testimony Such early postwar testimony Rosen avers deserves to be taken on its own terms rather than to be enfolded into earlier or later schemas of testimony Moreover Boder s efforts and the support he was given for them demonstrate that American postwar response to the Holocaust was not universally indifferent but rather often engaged concerned and resourceful
