

Cost Accounting Theories

CONCEPT OF COST ACCOUNTING

There are three branches of accounting, i.e. Financial Accounting, cost accounting and management accounting. Cost accounting is one of the branches of accounting, which has been developed due to the limitation of financial accounting. Financial accounting communicates economic information of an organization as a whole and that is used for external reporting purpose. The reporting of financial accounting may not be sufficient for internal reporting i.e. for the formulation of policy and strategy, decision making and control.

According to C. Gillespie "cost accounting is a set of procedures for determining the cost of a product and various activities involved in its manufacture and sales and for planning and measuring performance.

FEATURES OF COST ACCOUNTING

The following are the main features of cost accounting

Nature: Cost accounting is a branch of accounting. It is concerned with recording and reporting costs of output to the firm's management.

Objective: Its main objectives are to accumulate costs of output, job, process, unit and department and report them for different uses.

Status: It is complementary to financial accounting as it provides cost data of different kinds of stock for preparing financial statements.

Basis: It is the basis for cost estimate, cost control, and price determination of output.

Usefulness: It is useful for decision making and performance evaluation as it uses absorption or valuation costing technique in preparing income statements.

OBJECTIVES OF COST ACCOUNTING

There can be several objectives of cost accounting. However, the following are its important objectives:

TO ASCERTAIN COST

The important objective of cost accounting is to ascertain cost of a product or services or jobs. Ascertainment of cost is process of determining cost after they have been incurred. Generally, there are two methods of determining the cost i.e. job costing and process costing. Due to the different in the nature of activity of industry, different methods of cost may be applied.

TO CONTROL COST:

The objectives of cost accounting is to control over the cost by using various techniques such as standard costing, inventory control, marginal costing etc.

TO PROVIDE INFORMATION FOR DECISION MAKING:

Cost accounting is the formal system of accounting and provides information for various managerial decisions like:

- Whether to accept or reject the offer
- Whether to make or buy a product
- Whether to continue or replace the existing machine and
- Whether to drop or continue the product or services

TO FIX THE SELLING PRICE:

Cost accounting can be provide the detailed information about the cost of a product or service to determine the selling price.

TO ASCERTAIN COSTING PROFIT OR LOSS:

Cost accounting ascertains total cost and total revenue of every product or services or job and calculates profit or loss by comparing with revenue and cost.

TO PROVIDE INFORMATION IN PREPARATION OF FINANCIAL STATEMENTS:

Inventory should be valued for preparation of financial statements by comparing cost price and market price.

IMPORTANCE AND ADVANTAGES OF COST ACCOUNTING

Cost accounting provides immense advantages to a firm. It also can be explained in terms of importance:

HELPING IN ASCERTAINING OF COST:

Cost accounting uses different methods of costing such as job costing, process costing etc. applying this costing method cost of each product, process or job is ascertained.

HELPS IN INVENTORY CONTROL:

It helps in inventory control using various techniques like ABC analysis, economic order quantity, stock level etc.

HELPS IN MEASUREMENT OF EFFICIENCY:

It helps in measurement of efficiency of operations through establishment of standards and various analysis.

HELPS IN PREPARATION OF BUDGET:

It helps in preparation of various budgets such as sales budget, production budget, material purchase budget, flexible budget etc.

LIMITATIONS OF COST ACCOUNTING

Cost accounting also suffers from a number of limitations such as follows:

UNNECESSARY: It is unnecessary because it involves duplication of work, many good enterprise are functioning without any costing system.

Cost Accounting in Government Zachary Mohr, 2017-04-21 Managerial cost accounting is the financial and managerial tool that is used to estimate the organizational cost of products and services in business and government In recent decades cost accounting in the United States and other advanced industrial countries has been dominated by discussions of Activity Based Costing or ABC While ABC can be shown to produce a more accurate estimate of cost than older and more basic types of cost accounting ABC is not used extensively in many governments We argue that this recent focus on ABC has stifled examination and discussion of how government cost accounting is being used and how it could be used in practice The study of cost accounting practice reveals an important and underexplored area of financial management in government Given the scandals that cost accounting estimates can create and that different types of cost accounting can create different estimates of cost it may be reasonable to ask whether the cost accounting exercise is worth it *Cost Accounting in Government Theory and Applications* addresses these unusual and unusually important topics through a series of studies of different government cost accounting practices The first section of the book presents two chapters on the history and basic elements of cost accounting The second section of the book provides further discussion and case studies of actual cost accounting practices in the main areas that cost accounting has been used in government benchmarking the

performance of government services rate setting grant overhead cost recovery and cost management The last two chapters discuss cost accounting practices in Europe and the future of cost accounting These cases span local and federal governments and provide a much needed context to the study of cost accounting in government Aimed at academics researchers and policy makers in the fields of Accounting Public Administration and Government Studies Cost Accounting in Government Theory and Applications seeks to address the practical and theoretical gap in government cost accounting research with case studies of different public agencies that are using cost accounting for different purposes The case studies illustrate that different purposes for cost accounting create unique and interesting cost accounting practices The case studies provide useful examples of actual cost accounting systems that can inform both research and instruction

tip speed ratio wikipedia - Feb 26 2022

web the tip speed ratio λ or tsr for wind turbines is the ratio between the tangential speed of the tip of a blade and the actual speed of the wind the tip speed ratio is related to efficiency with the optimum varying with blade design higher tip speeds result in higher noise levels and require stronger blades due to larger centrifugal forces the tip speed
