Ghana gives insight into and highlights the issues involved in this subject area with regards to a person suffering from what would appear to be a personality disorder. It demonstrates how easy it is to apply theory to practice; it takes the reader through a step by step critical review of the literature and theories associated with personality and personality disorder to arrive at a diagnosis of an individual with psychopathology. It demonstrates the application of the literature in investigations and assessments in mental health and is a must read for anyone in the fields of medicine, psychology and mental health nursing, particularly students, lecturers and teachers. The critical analysis review of the literature and the demonstration of the correlation between theories, the literature and relevant individual information and assessment to achieve the desired results of diagnosing the disorder are expertly, competently and proficiently executed to highlight the ease with which anyone can do so, particularly learners. For the layperson, this book gives insight into our day to day challenges of living with an individual suffering from a mental disorder, specifically severe personality disorder of the psychopathic and sociopathic types.

The Decision to Trust Robert F. Hurley, 2011-10-25. A proven model to create high performing high trust organizations. Globally, there has been a decline in trust over the past few decades and only a third of Americans believe they can trust the government, big business and large institutions. In *The Decision to Trust*, Robert Hurley explains how this new culture of cynicism and distrust creates many problems and why it is almost impossible to manage an organization well if its people do not trust one another. High performing world class companies are almost always high trust environments. Without this elusive important ingredient, companies cannot attract or retain top talent. In this book, Hurley reveals a new model to measure and repair trust with colleagues, managers and employees. Outlines a proven Decision to Trust Model (DTM) of ten factors that establish whether or not one party will trust the other. Filled with original examples from Daimler, PriceWaterhouse Coopers, Goldman Sachs, Microsoft, QuikTrip, General Electric, Procter and Gamble, AzKo, Nobel Johnson and Johnson, Whole Foods and Zappos. Reveals how leaders in Asia, Europe and North America have used the DTM to build high trust organizations. Covering trust building in teams, across functions within organizations and across national cultures. *The Decision to Trust* shows how any organization can improve trust and the bottom line.
