It is not only about learning knowledge; the scientific foundation for counseling and guiding programs is one of the book's main concerns. It underlines the vital part that direction plays not only in the whole personal growth of people but also in the educational system. Examining the fundamental ideas of direction, the book emphasizes why it is so important in modern colleges and other educational environments. The several services offered in school guidance programs, the function of counselors, and the requirement of knowing students' particular needs for promoting their intellectual, emotional, and social development are discussed.

reservations and objections clients had to the ABC framework in a research study of an REBT based program in a psychiatric hospital. Additionally, errors and confusions on the part of those writing about the therapy are reviewed. Further study was made on the accuracy of REBT therapists themselves in teaching this therapy to students. Also included is an analysis of how Albert Ellis himself has explicated the ABCs. This book is the first to systematically study how different groups conceptualise the ABCs of REBT and the errors that are commonly made in interpreting and putting them into practice.
