focus with increasing intensity on the issues they face as elderly members of society and as people facing end of life decision making The inevitability of death does not detract from the onset of death anxiety An emerging strategy is the use of existential philosophical principles in the creation of an operational psychoanalytic praxis Because end of life issues often result in the desire by individuals to confront their existence existential philosophy the application of an existential psychotherapeutic approach has been introduced as a part of existing research This has led to the identification of death fear as a major development in the presence of end of life assessments An operational psychoanalytic model that addresses the issue of the fear of death is a major development The underlying belief shared by researchers is that fear is inherent for both doctors and patients and requires understanding and compassion on both sides of the equation This research study is designed to assess the models or psychoanalytical praxes introduced when addressing the needs of elderly individuals and to evaluate both the historical context in which they were formed and the support mechanisms for their continuation

Parenting a Happy Child Peter Claver Ugo, 2018-10-19 A Latin adage says *Dat quod non habet* meaning No one gives what he does not have This wise saying makes sense in the business of parenting We are in an age where children are begetting children due to lack of knowledge which contributes to rampant teenage pregnancy It gets complicated when a teenager who should still need parental care becomes a parent This book examines some of the fundamental precautions that should be taken from the moment of conception such as the effects of toxins or teratogens that could affect the health of the baby in the womb Every parent who has the good of their baby in the womb in mind should know about these toxins and avoid putting them into their body The fundamentals to parenting with resilience and grace lies in the sacred nature of the human body as presented in this book Any form of physical and emotional abuse or addiction to alcohol and substances of abuse that can pose danger to the unborn baby or a child should be avoided The need for the parents to form a secure attachment with the baby cannot be underestimated as insecure attachment could result to lifelong emotional and psychological imbalance in the child if not properly addressed This book also seeks to emphasize that no two persons are ever the same not even identical twins Therefore the former idea in parenting that tends to say that one size fits all is untenable when it comes to raising a child who can live true to his or her nature I have in this book explored the various traits and energy movements that could inform the personality of your child and offer best practice tips to raise each child to be happy and successful Many behavioral warning signs that could show when the child is not properly being raised or abused are discussed Finally some measures that could be taken to arrest the effects of poor parenting and healing of a traumatized inner child are equally presented It is my sincere hope that many will find this book a good guide and reference book in raising their children
