Umberto Eco's Semiotics Bujar Hoxha, 2022-01-05 This text explores four books produced by one of the most prominent semioticians of the previous century Umberto Eco in order to create a semiotic meta theory which enhances a multifarious way of readability and scientifically justifies the dichotomy between the creation of a work of art and its being read visualized and experienced by the audience It begins by treating the narration component as one of the main theoretical challenges of Eco's theory specifically focusing on the concept of time seen from the linguistic and semiotic viewpoints The book also explores Eco's text theory as well as semiotics proper representing an analysis of the encoding and decoding theories In addition it exemplifies the openness and collaboration between the writer and the reader as well as relationships between the creator and audience in all forms of art The book will appeal to scholars students and intellectuals who want to have a detailed knowledge of Eco's overall contribution to semiotics and seek a formula which would interconnect informational and code theories with the narration method so as to create what we call interpretative semiotics today
