This is a fantastic and most welcome resource as the new chapters on AI and neurodiversity as well as further developments and resources on other sections bring it right up to date. Not only is it a very informative and useful resource, it also provides lots of excellent tasks and tools to employ that are a significant benefit to the writing processes at this level. Model-Based Performance Prediction for Concurrent Software on Multicore Architectures---A Simulation-Based Approach Frank, Markus Kilian, 2022-07-18 Die modellbasierte Performancevorhersage ist ein bekanntes Konzept zur Gewährleistung der Softwarequalität. Derzeitige Ansätze basieren auf einem Modell mit einer Metrik was zu ungenauen Vorhersagen für moderne Architekturen führt. In dieser Arbeit wird ein Multi-Strategie-Ansatz zur Erweiterung von Performancevorhersagemodellen zur Unterstützung von Multicore Architekturen vorgestellt. In Palladio implementiert und dadurch die Genauigkeit der Vorhersage deutlich verbessert. Model based performance prediction is a well known concept to ensure the quality of software. Current approaches are based on a single metric model which leads to inaccurate predictions for modern architectures. This thesis presents a multi strategies approach to extend performance prediction models to support multicore architectures. Phonological Templates in Development Marilyn May Vihman, 2019-10-24 This book explores the role of phonological templates in early language use from the perspective of usage based phonology and exemplar models and within the larger developmental framework of Dynamic Systems Theory. After analysing children's first words and their adult targets Vihman sets out procedures for establishing the children's later

prosodic structures and templates drawing on data from American and British English Estonian Finnish French Italian and Welsh she also provides briefer longitudinal accounts of template use in Arabic and Brazilian Portuguese The children are found to begin with simple word forms that match their selected adult targets this is followed by the production of more challenging words adapted to fit the child's existing patterns Early accuracy is replaced by later recourse to an inner model a template of a favoured word shape The book also examines the timing fading quantification and function of child phonological templates In addition two chapters focus on the use of templates in adult language in the core grammar and in the more creative morphology of colloquial short forms and hypocoristics in French and Estonian and of English rhyming compounds The idea of templates is traced back to its origins in Prosodic Morphology but its uses are most in evidence in the informal settings of adult language at play Throughout the volume the discussion returns to the issues of emergent systematicity the roles of articulatory and memory challenges for children and the similarities and differences in the function of templates for adults as compared with children
