Berger on Religion provides an overview and critical assessment of the work of one of the most influential sociologists of the 20th century Situating Berger's writings on religion and secularisation in the broader framework of social constructionism the book argues that neither he nor the research influenced by him consistently followed the constructionist paradigm This assessment is informed by a close examination of *The Sacred Canopy* 1967 in particular The volume also offers a Berger inspired constructionist framework for the study of religion This book is an excellent resource for students and researchers interested in the intersection of religion and social theory *Transcending Modernity with Relational Thinking* Pierpaolo

**The Methodology of Political Economy** J.I. Bakker,2015-12-24 The importance of the global rural urban matrix is often overlooked due to urban normativity But sometimes agrarian populism and a pastoral rural imaginary result in the equally fallacy of a rural normativity as in Jeffersonian nostalgia for a lost way of life that never existed The nature of rurality in North America is important to study but as Alessandro Bonanno makes clear we cannot limit ourselves to the study of one or two nation states We must take a global perspective when it comes to the bio physical environment and the nature of the world capitalist system This collection takes such a perspective The editor frames the contributions with a Meta Paradigm called the New Political Economy Perspective NPEP and explains the roots of that approach in Classical Political Economy and the Canadian Political Economy Tradition of Harold Adams Innis There are chapters by an anthropologist a geographer two generalist sociologists and a group of rural sociologists There is also a chapter on psychiatry and mental health and another chapter which discusses pedagogy The use of an inter disciplinary framework to study global issues makes this a stimulating book which provides a window on issues that are often overlooked

Re-Thinking Economics Asimina Christoforou, Michael Lainé, 2014-05-30 Once again unfettered capitalism has failed Promises for global prosperity and peace have given way to a world of deep recession social upheaval and political instability Once again mainstream economics has proved its inadequacy Despite its technical rigour and mathematical virtuosity it failed dramatically to respond to the current crisis Why is this so Mainstream economics turns a blind eye to society By assumption it maims its analyses by wiping away what makes us what we are There is pressing need for a critical discussion and new ideas We therefore turn to the insightful and stimulating work of Pierre Bourdieu Arguably one of the major sociologists ever he was also a major economist Yet his works on the economy have received only scant attention especially from economists be they mainstream or heterodox Bourdieu helps to take a broader view and enrich our scientific imagination By including dimensions of power intuitive behaviour and social structures within the scope of his analysis he provides for an alternative foundation of economics based on an integrated interdisciplinary theory For the first time this volume fills this gap in economics by featuring state of the art research and experts from different social science disciplines This book constitutes a first step and hopes to become a milestone The book offers an innovative outlook and a unique source for social scientists of all fields particularly economists and sociologists who wish to engage in the study of Bourdieu and his economics with a view to developing a more pertinent theory It will also constitute a useful reference for university students and administrators who would like to explore the economy from a Bourdieusian perspective
