How to Study and Learn a Discipline Richard Paul, Linda Elder, Foundation for Critical Thinking, 2006      **The Thinker's Guide for Students on How to Study and Learn a Discipline** Richard Paul, Linda Elder, 2014 This volume of the Thinker's Guide Library presents critical thinking skills essential to mastering any area of study. Students are empowered to take ownership of their thinking and learning by asking questions challenging assumptions and drawing upon reliable sources. The g      *The Thinker's Guide for Students on How to Study & Learn a Discipline* Richard Paul, Linda Elder, 2019-06-01 The Thinker's Guide for Students on How to Study and Learn a Discipline empowers students to take control of their own learning by asking questions challenging assumptions drawing upon reliable information and exploring alternative opinions. Making intellectual work more accessible practical and engaging this book fosters minds that question probe and can master a variety of forms of knowledge through intellectual perseverance and regular use of critical thinking skills. As part of the Thinker's Guide Library this book advances the mission of the Foundation for Critical Thinking to promote fair minded critical societies through cultivating essential intellectual abilities and virtues across every field of study across world.

*The Thinker's Guide for Students on how to Study & Learn a Discipline Using Critical Concepts & Tools* Richard Paul, Linda Elder, Foundation for Critical Thinking, 2001 This thinker's guide contributes toward making intellectual work and deep learning more manageable practical and intuitive. Its goal is to foster lifelong learning and the traditional ideal of a liberally educated mind a mind that questions probes and masters a variety of forms of knowledge through command of itself intellectual perseverance and the tools of learning. In this guide we suggest a variety of strategies for becoming not just a better student but a master student. This thinker's guide is designed not only for students but also for administrators and faculty to remind us all of the essence of what it is to study academic subjects with discipline. It does not aim to take the intellectual work out of learning for this would be an insult to the intelligence of our readers. It contributes rather toward making intellectual work and deep learning more manageable practical and intuitive. Its goal is to foster lifelong learning and the traditional ideal of a liberally educated mind a mind that questions probes and masters a variety of forms of knowledge through command of itself intellectual perseverance and the tools of learning. It respects equally the traditions of John Henry Newman Bertrand Russell and Albert Einstein. It does not answer all questions but rather puts all questions into a clear perspective. It emphasizes that all bona fide fields of study share common intellectual structures and standards of reasonability. It emphasizes that foundational intellectual structures and standards of reasonability are worth learning explicitly and in themselves since they help us more deeply interconnect and understand all that we learn. It also emphasizes foundational intellectual dispositions and values that define the traits of the disciplined thinker in all fields intellectual autonomy intellectual humility intellectual integrity intellectual perseverance intellectual empathy confidence in reason and fair mindedness. On every page it honors the idea and power of intellectual work. It scorns the idea of knowledge as the

memorizing of bits and pieces of information or as the mere accumulation of so many units or institutional credits It rejects both dogmatic absolutism and intellectual relativism It warns us of the danger of ignorance and misconception and by implication that of self deception and illusion in human affairs It emphasizes the importance of contrasting disciplines whose questions are by and large answerable in definitive ways with those whose questions require multiple perspectives role playing and reasoned judgment It distinguishes in short one system subjects like physics chemistry and math where disagreement between experts plays a minor role from competing systems subjects like history psychology and art where expert disagreement plays a major role If this thinker s guide is successful it will serve as a resource to which one can return again and again to garner new depth of meaning and understanding What is worth learning is worth learning well and there is nothing better worth learning than the very process of learning itself the development through systematic intellectual work of the arts habits and strategies of a DISCIPLINED mind Publisher      **The Thinker's Guide to Socratic Questioning**
