the core ideas of nineteenth century philosophy in an historically transitional period It covers the most important philosophers of the era including Hegel Fichte Schopenhauer Mill Kierkegaard Marx Nietzsche Bradley and philosophers whose work manifests the transition from the nineteenth century into the modern era such as Sidgwick Peirce Husserl Frege and Bergson The study of nineteenth century philosophy offers us insight into the origin and creation of the modern era In this volume readers will have access to a thorough and clear understanding of philosophy that shaped our world

Heidegger's Alternative History of Time Emily Hughes, Marilyn Stendera, 2024-04-02 This book reconstructs Heidegger's philosophy of time by reading his work with and against a series of key interlocutors that he nominates as being central to his own critical history of time In doing so it explains what makes time of such significance for Heidegger and argues that Heidegger can contribute to contemporary debates in the philosophy of time Time is a central concern for Heidegger yet his thinking on the subject is fragmented making it difficult to grasp its depth complexity and promise Heidegger traces out a history that focuses on the conceptualisations of time put forward by Aristotle Plotinus Augustine Kant Hegel Bergson and Husserl an alternative history of time that challenges how time has been defined and studied within both philosophy and the sciences This book explores what happens when we take seriously Heidegger's claim that these seven figures are essential to any understanding of time setting out what this can tell us about existence possibility and philosophy as a historical discipline Heidegger's Alternative History of Time will appeal to scholars and advanced students working on Heidegger phenomenology the philosophy of time and the history of philosophy

Subversive Property Sarah Keenan, 2014-08-13 This book explores the relationship between space subjectivity and property in order to invert conventional socio legal understandings of property Sarah Keenan demonstrates that new political possibilities for property may be unveiled by thinking about property in terms of space and belonging rather than exclusion Drawing on feminist and critical race theory this book shifts focus away from the propertied subject and on to the broader spaces in and through which the propertied subject is located Using case studies such as analyses of compulsory leases under Australia's Northern Territory Intervention and lesbian asylum cases from a range of jurisdictions Keenan argues that these spaces consist of networks of relations that revolve around belonging not just belonging between subject and object as property is traditionally understood but also the less explored relation of belonging between the part and the whole This book therefore offers a conceptually useful way of analysing a wide range of socio legal issues It will be of relevance to those working in the area of property and legal geography but also to those with more general interests in socio

legal studies social and political theory postcolonial studies critical race studies and gender and sexuality studies The Tempo of Modernity Gabriel R. Ricci, 2017-09-08 The present work is a study in the history of an enduring idea that defines the inner life of the mind and also supplied a substratum for the twentieth century literary imagination and substance for philosophical thinking producing a unique alliance between philosophy and literature This special union was forged by a new holistic conception of time which supplemented and even supplanted the conventional sense of chronological time This temporal turn animated the existential insights of Husserl Heidegger and Bergson but it was grounded in nineteenth century advances in the biological sciences the hegemony of Hegelianism and even stretched back to Augustine's early meditation on time in Book XI of his Confessions In linking together a set of thinkers who addressed this form of temporal consciousness Gabriel R Ricci illuminates a common intellectual preoccupation from the vantage point of a concept The authors do not together assemble the thought it is the thought that produced a collective voice This voice appears in the episodes outlined in each chapter and they are framed by an introduction which explores Joseph Frank's insights into the new spatial forms in literature and an epilogue which resurrects J W Dunne's peculiar dream experiments and theory of precognition Ricci employs Frank's seminal essay to draw comparisons between literature's adaptation of the new time sense and philosophy's expression of the new compatibility between space and time Dunne's theory serves to demonstrate the continuity between literary form and philosophical speculation The Routledge Companion to Nineteenth Century Philosophy Dean Moyal, 2010-04-05 The nineteenth century is a period of stunning philosophical originality characterised by radical engagement with the emerging human sciences Often overshadowed by twentieth century philosophy which sought to reject some of its central tenets the philosophers of the nineteenth century have re-emerged as profoundly important figures The Routledge Companion to Nineteenth Century Philosophy is an outstanding survey and assessment of the century as a whole Divided into seven parts and including thirty chapters written by leading international scholars the Companion examines and assesses the central topics themes and philosophers of the nineteenth century presenting the first comprehensive picture of the period in a single volume German Idealism philosophy as political action including young Hegelians Marx and Tocqueville philosophy and subjectivity including Schopenhauer Kierkegaard and Nietzsche scientific naturalism including Darwinism philosophy of race experimental psychology and Neo Kantianism utilitarianism and British Idealism American Idealism and Pragmatism new directions in Mind and Logic including Brentano Frege and Husserl The Routledge Companion to Nineteenth Century Philosophy is essential reading for students of philosophy and for anyone interested in this period in related disciplines such as politics history literature and religion **The Oxford Handbook of Process Philosophy and Organization Studies** Jenny Helin, Tor Hernes, Daniel Hjorth, Robin Holt, 2014-05 This Handbook presents key ideas of philosophers and social theorists whose ideas inform process approaches to organization studies Each chapter addresses the background and context of this thinker their work with a focus on the processual elements and the potential contribution to

Massey, 2015-02-23 A critical examination of the relationship between the philosophies of Martin Heidegger and Henri Bergson focusing on the central issue of time The recent renewal of interest in the philosophy of Henri Bergson has increased both recognition of his influence on twentieth century philosophy and attention to his relationship to phenomenology Until now the question of Martin Heidegger's debt to Bergson has remained largely unanswered Heidegger's brief discussion of Bergson in *Being and Time* is geared toward explaining why he fails in his attempts to think more radically about time Despite this dismissal a close look at Heidegger's early works dealing with temporality reveals a sustained engagement with Bergson's thought In *The Origin of Time* Heath Massey evaluates Heidegger's critique of Bergson and examines how Bergson's efforts to rethink time in terms of duration anticipate Heidegger's own interpretation of temporality Massey demonstrates how Heidegger follows Bergson in seeking to uncover primordial time by disentangling temporality from spatiality how he associates Bergson with the tradition of philosophy that covers up this phenomenon and how he overlooks Bergson's ontological turn in *Matter and Memory* Through close readings of early major works by both thinkers Massey argues that Bergson is a much more radical thinker with respect to time than Heidegger allows **Time on a**
