

Boroditsky et al. (2003)

- Asked:
 - Do people include gender in their conceptual representations of objects?
 - Are people's ideas about the genders of objects influenced by grammatical genders assigned in their native languages
- Experiment
 - Taught Spanish and German speakers object-name pairs (e.g., apple-Patrick)
 - Name was either consistent or inconsistent with the grammatical gender of the object in their native language
 - Measured memory for the pairs; all testing was in English
- Results: Both Spanish and German speakers remembered object-name pairs better when the gender of the proper name given to an object was consistent with the grammatical gender of the object name in their native language than when the two genders were inconsistent.
- Conclusion: Grammatical gender focuses speakers of different languages on different aspects of objects Supports the Sapir-Whorf hypothesis
