country's most notable authors. Anxious about her prospects after leaving a stagnant job, Tambudzai finds herself living in a run-down youth hostel in downtown Harare. For reasons that include her grim financial prospects and her age, she moves to a widow's boarding house and eventually finds work as a biology teacher. But at every turn in her attempt to make a life for herself, she is faced with a fresh humiliation until the painful contrast between the future she imagined and her daily reality ultimately drives her to a breaking point. In *This Mournable Body*, Tsitsi Dangarembga returns to the protagonist of her acclaimed first novel, *Nervous Conditions*, to examine how the hope and potential of a young girl and a fledgling nation can sour over time and become a bitter and floundering struggle for survival. As a last resort, Tambudzai takes an ecotourism job that forces her to return to her parents' impoverished homestead. It is this homecoming in Dangarembga's tense and psychologically charged novel that culminates in an act of betrayal, revealing just how toxic the combination of colonialism and capitalism can be.

**Socio-Cultural Perspectives on Science Education** W.W. Cobern, 2012-12-06. Global science education is a reality at the end of the 20th century, albeit an uneven reality because of tremendous technological and economic pressures. Unfortunately, this reality is rarely examined in the light of what interests the everyday lives of ordinary people rather than the lives of political and economic elites. The purpose of this book is to offer insightful and thought-provoking commentary on both realities. The tacit question throughout the book is: Whose interests are being served by current science education practices and policies? The various chapters offer critical analysis from the perspectives of culture, economics, epistemology, equity, gender, language, and religion in an effort to promote a reflective science education that takes place within rather than taking over the important cultural lives of people. The target audience for the book includes graduate students in education, science education, and education policy, professors, policy, and government officials involved with education.

*Some Developments in Research in Science and Mathematics in Sub-Saharan Africa* Lorna Holtman, 2008. Much attention in late-developing countries is given to providing access to studies which allow school leavers to enter science and technology-related careers. These programmes are driven by the belief that graduates will then substantially contribute to the developmental needs of their countries. But is providing access to institutions enough? Students in developing countries often come from school environments lacking in resources, human, physical, and financial. This book, in a number of chapters, reviews research related to the crucial dimension of epistemological access to the disciplines of import which students need as much as institutional access in order to improve

their chances of success A significant feature of this collection s research studies is that their empirical bases are highly localised covering areas such as research methods access curriculum instruction and assessment and the relevance of science and mathematics education in Zimbabwe Uganda Swaziland South Africa Namibia Malawi Ghana and Lesotho This volume provides invaluable insights and will be of relevance to researchers policy makers and lecturers interested in these research outcomes in Sub Saharan Africa It is the outcome of a doctoral research capacity development project the Graduate Studies in Science Mathematics and Technology Education GRASSMATE
