Oren Cass,2018-11-13 Cass s core principle a culture of respect for work of all kinds can help close the gap dividing the two Americas William A Galston The Brookings Institution The American worker is in crisis Wages have stagnated for more than a generation Reliance on welfare programs has surged Life expectancy is falling as substance abuse and obesity rates climb These woes are not the inevitable result of irresistible global and technological forces They are the direct consequence of a decades long economic consensus that prioritized increasing consumption regardless of the costs to American workers their families and their communities Donald Trump s rise to the presidency focused attention on the depth of the nation s challenges yet while everyone agrees something must change the Left s insistence on still more government spending and the Right s faith in still more economic growth are recipes for repeating the mistakes of the past In this groundbreaking re evaluation of American society economics and public policy Oren Cass challenges our basic assumptions about what prosperity means and where it comes from to reveal how we lost our way The good news is that we can still turn things

around if the nation's proverbial elites are willing to put the American worker's interests first Which is more important pristine air quality or well paying jobs that support families Unfettered access to the cheapest labor in the world or renewed investment in the employment of Americans Smoothing the path through college for the best students or ensuring that every student acquires the skills to succeed in the modern economy Cutting taxes expanding the safety net or adding money to low wage paychecks The renewal of work in America demands new answers to these questions If we reinforce their vital role workers supporting strong families and communities can provide the foundation for a thriving self sufficient society that offers opportunity to all

EU Legal Acts Marise Cremona, Claire Kilpatrick, 2018-02-08 In this collection of essays originally presented at the Academy of European Law in Florence the changing landscape of the EU s legal acts is explored Further to this the changing boundaries between legal acts and processes which may create norms but do not create law in the traditional sense are analysed This landscape is presented in two ways Firstly by focusing on the transformations and challenges to the EU s traditional legal acts in particular since the reconfiguration of the categories of legal acts and the procedures for which they are adopted by the Lisbon Treaty Secondly the collection focuses on those acts found at or beyond the margin of classic EU legal acts including acts of Member States such as inter se treaties self regulation and collective agreements so called soft law and decision

making outside the normal legislative procedures The volume endeavours to explain the adaptability of the EU legal order despite the fact that the legal instruments at the Union's disposal have not fundamentally changed since the Treaty of Rome came into force 60 years ago It explores the challenges that new decisional procedures and variations in the legal quality of EU acts pose for the EU's legal order including alterations to institutional balance and the roles of the different institutional actors and challenges to the rule of law Judicial institutionalization of integration processes Ricardo Caichiolo, 2016-09-07

The focus of this book is the judicial institutionalization of integration processes through the development of dispute settlement mechanisms more specifically in the Common Market of the South MERCOSUR to date the most important regional bloc in Latin America The bloc has been in existence since 1991 and has positioned itself as one of the potential regional blocs for trade and investment while becoming one of the important actors in the international community However its achievements have been tainted by the gaps and problems attached to the core foundation of the regional bloc MERCOSUR has been suffering or experiencing internal disputes and disunity due to its complex and low institutionalization a situation which can be seen as being paradoxical Its current Dispute Settlement Mechanism is subject to uncertainty and doubt since its own framework is also under internal and external criticism There has been a series of protocols made in order to tackle the problems of the DSM and to further fix the problems that hinder the cooperation as well as the productivity of MERCOSUR's intra organisation all guided by intergovernmental decision making As such this book seeks to tackle the concept of regionalism and the possible models which have been used or have influenced the establishment of MERCOSUR while discussing the different aspects and developments of each intra organisation This is done in order to evaluate the nature of the problem and future developments that could take place The book also focuses on the prevalence of politicization in MERCOSUR and the pre-eminence of Presidential Diplomacy over the path of regional integration which influence the DSM of MERCOSUR and possible developments that might occur in the near future
