However behind the public face of design architectural life in Canada during the 1880s and 1890s was in turmoil The Canadian public had lost confidence in its designers students were forced to study abroad to secure a first class education professional rivalry was unscrupulous architectural competitions a scandal American architects and their architecture were the fashion These things changed but not before the world of the Canadian architect had been turned on its head replaced by one which resembled the world of contemporary architects with professional organisations regulated standards formalised education centred in the universities and the belief that Canadian architecture should reflect local climates culture and geography Kelly Crossman provides the first analysis of this period Beginning with a review of the architectural milieu in Toronto and Montreal in the 1880s he traces the rise of professionalism as an idea and architectural nationalism as a goal His analysis is more a history of architectural ideas than a survey of forms It places the architecture of these years in an historical and ideological context demonstrating that it developed with its own logic in response to national and international factors During the two decades after 1885 Canadian architects grappled with problems whose long term implications they could not have foreseen the role of the architect in industrialised society the need to accommodate and integrate applied science and the need to express their own and their country's personality in architectural form By the beginning of this century they had begun to find their own voice The story of this process will be of interest not just to students and scholars but to anyone interested in the development of Canada and its architecture

Finding Your Seat at the Table Susan M. Harnett, Laureen P. Cantwell-Jurkovic, 2022-02-19 Service on Institutional Review Boards IRB and Institutional Animal Care and Use Committees IACUC is an uncommon activity for librarians Even librarians who participate in institutional research activities in a supportive capacity or conduct their own original research as scholars themselves and are familiar with the IRB IACUC research approval process they may hesitate to participate more fully with these boards There may be a perception that the work of the IRB and IACUC is too scientifically complex for librarians without an appropriate background Library administrators may not advocate for librarian inclusion on the board for fear of additional burdens on the librarian s time and university administrators might need some convincing of the librarian s suitability to perform this work This book provides librarians with foundational knowledge of the IRB and IACUC describes the work of these important committees and expands librarians conceptualization and knowledge of opportunities to create services and partnerships through participation The book provides a progressively more comprehensive understanding of the work of these committees Parts I and II discuss IRB and IACUC respectively their

history functions and membership Part III highlights expanding roles for librarians on IRB and IACUC and in institutional research activities A special feature of this section describes the experiences of librarians in their own words who work with IRB or IACUC what they have learned how they have used their experiences to create partnerships and market library services and what role they see for libraries and librarians in institutional research
