Working Effectively With Your Teaching Assistant Sara Alston, 2023-02-02 From Sara Alston co author of The Inclusive Classroom comes a new book supporting

primary teachers to work more effectively with their teaching assistants to promote children's learning. Specifically focused for early career teachers, this book provides valuable support for managing this vital but potentially challenging relationship. *Working Effectively With Your Teaching Assistant* supports teachers in maintaining classroom relationships including working with the expert or inexperienced TA. It explains different TA roles including the role of the classroom TA or learning support assistant, the special needs assistant, and 1:1 TA. It covers different forms of intervention including pre and over learning and the importance of ensuring that all children access quality first teaching, how to work collaboratively including ways of sharing planning and feedback, differentiation strategies, promoting independence, and how to support each other beyond the classroom. Featuring quotes from TAs about their classroom experience and what would help them, plus solutions for when things don't go to plan, this book will help primary teachers to have a significant impact on learning while saving themselves time and reducing stress.

New Trends of Research in Ontologies and Lexical Resources Alessandro Oltramari, Piek Vossen, Lu Qin, Eduard Hovy, 2013-02-01. In order to exchange knowledge, humans need to share a common lexicon of words as well as to access the world models underlying that lexicon. What is a natural process for a human turns out to be an extremely hard task for a machine; computers can't represent knowledge as effectively as humans do, which hampers, for example, meaning disambiguation and communication. Applied ontologies and NLP have been developed to face these challenges. Integrating ontologies with possibly multilingual lexical resources is an essential requirement to make human language understandable by machines and also to enable interoperability and computability across information systems and ultimately in the Web. This book explores recent advances in the integration of ontologies and lexical resources, including questions such as building the required infrastructure, e.g. the Semantic Web, and different formalisms, methods, and platforms for eliciting, analyzing, and encoding knowledge contents, e.g. multimedia, emotions, events, etc. The contributors look towards next generation technologies, shifting the focus from the state of the art to the future of Ontologies and Lexical Resources. This work will be of interest to research scientists, graduate students, and professionals in the fields of knowledge engineering, computational linguistics, and semantic technologies.

Technology for SEND in Primary Schools Helen Caldwell, Stephen Cullingford-Agnew, 2017-10-23. With so many new education technologies being developed and made available to schools, how do teachers ensure they select resources that enhance inclusive teaching in the classroom? How can you make sure new technologies are integrated into every day teaching? This new text supports trainee and beginning teachers to harness the power of technology to make their classrooms truly inclusive. It helps you make informed selections of new technology and resources and make them work for everyone in your classroom. Along with clear guidance on how to implement an inclusive approach to the use of technology across a broad range of needs and curriculum themes, linking practical examples with discussion of pedagogical considerations, this practical book focuses on cutting edge technologies, supports teachers to develop the knowledge and skills they need, offers advice on how to assess individual learning and

communication needs develops an understanding of the pedagogy needed to embed inclusive technology within whole class teaching
