Their prodigious output looks effortless they leap from summit to summit and they probably couldn't explain exactly how they went about solving their problems They might not even recognize themselves in the ways we talk about them today Atalay argues that these heroes fit more of a mold than we might think As evidence he rigorously dissects the lives traits habits and thought patterns of five exemplars Leonardo Shakespeare Newton Beethoven and Einstein to map the path of the transformative genius How did Beethoven who could not perform basic multiplication innately encode the Fibonacci Sequence in his symphonies Is it possible that we understate Shakespeare's poetic influence How did Leonardo become equally prolific in both the arts and the sciences How did Newton formulate the universal laws of physics the basis of so many other sciences And what prompted TIME Magazine to declare Einstein a man whose very name is synonymous with genius the Individual of the 20th Century With great clarity and attention to detail Atalay expertly traces how these five exemplars ascended to immortality and what their lives and legacies reveal about how transformative geniuses are made
