**Revealing Tacit Knowledge** Frank Adloff, Katharina Gerund, David Kaldewey, 2015-03-15 How does tacit knowledge inscribe itself into cultural and social practices As the established distinction between tacit and explicit or discursive forms of knowledge does not explain this question the contributions in this volume reconstruct describe and analyze the manifold processes by which the tacit reveals itself They focus for example on metaphors feelings and visualizations as explications of the tacit as well as on processes of embodiment Taken together they demonstrate that the tacit does not constitute a single or unified knowledge complex but has to be understood in its differentiated and fragmented forms In addition to scholarly essays the volume features interviews with Mark Johnson Theodore Schatzki and Lo c Wacquant [With a Little Help from My Friends](#) Paula J. Mellom, Rebecca K. Hixon, Jodi P. Towards an Aesthetics of the Victorian Novel  
Nadine Böhm-Schnitker, 2023-11-16 Towards an Aesthetics of the Victorian Novel Senses and Sensations establishes a new analytical method in the broader context of sensory studies in order to explain how the genre of the novel can impact on our perception of ourselves and our social contexts Taking cultural literary studies ahead the book re integrates aesthetics a much fraught concept in cultural studies that long favoured popular over high culture into cultural studies as aesthetics in the word's root sense of perception Zooming in on period shifts and changes in taste spanning realism sensation fiction and aestheticism aesthetics reveals how these shifts also pertain to new ways of perceiving in selected novels by George Eliot Wilkie Collins and Vernon Lee Connecting Victorian and current literary theories aesthetics helps explore the way in which the novel can shape the way we perceive the world what remains excluded from the realm of the perceivable and how our conduct is consequently always also influenced by the dominant genres of our time

**Change** Paul Hager, Alison Lee, Ann Reich, 2012-06-25 The three concepts central to this volume practice learning and change have received very different treatments in the educational literature an oversight directly confronted here While learning and change have been extensively theorised their various contexts articulated and analysed practice is notably underrepresented Where much of the literature on learning and change takes the notion of practice as an unexamined given its co location as a term with various classifiers as in legal practice and teaching practice render it curiously devoid of semantic force In this book practice is the super ordinate organising idea Drawing on what has been termed the practice turn in contemporary theory the work develops a conceptual framework for researching learning in and on practice It challenges received notions of practice questioning the assumptions elisions conflation and silences on the subject In so doing it offers fresh insights into learning and change and how they relate to practice In tandem with this conceptual work the book details site ontological studies of practice and learning in diverse professional and workplace contexts examining the work of occupations as various as doctors chefs and orchestral musicians It demonstrates the value of theorising practice learning and change as well as exploring the connections between them amid our evolving social and institutional structures

**Making Sense of Mind-Game Films** Simin Nina Littschwager, 2019-06-27 Mind game films and other complex narratives have been a prominent phenomenon of the cinematic landscape during the period 1990 2010 when films like The Sixth Sense Memento Fight Club and Source Code became critical and commercial successes often acquiring a cult status with audiences With their multiple story lines unreliable narrators ambiguous twist endings and paradoxical worlds these films challenge traditional ways of narrative comprehension and in many cases require and reward multiple viewings But how can we make sense of films that don't always make sense the way we are used to While most scholarship has treated these complex films as narrative puzzles that audiences solve with their cognitive skills Making Sense of Mind Game Films offers a fresh perspective by suggesting that they appeal to the body and the senses in equal measures Mind game films tell stories about crises between body mind and world and about embodied forms of knowing and subjective ways of being in the

world Through compelling in depth case studies of popular mind game films the book explores how these complex narratives take their embodied spectators with them into such crises The puzzling effect generated by these films stems from a conflict between what we think and what we experience between what we know and what we feel to be true and between what we see and what we sense

**Visible Identities** Linda Martín Alcoff, 2005-12-22 In the heated debates over identity politics few theorists have looked carefully at the conceptualizations of identity assumed by all sides Visible Identities fills this gap Drawing on both philosophical sources as well as theories and empirical studies in the social sciences Mart n Alcoff makes a strong case that identities are not like special interests nor are they doomed to oppositional politics nor do they inevitably lead to conformism essentialism or reductive approaches to judging others Identities are historical formations and their political implications are open to interpretation But identities such as race and gender also have a powerful visual and material aspect that eliminativists and social constructionists often underestimate Visible Identities offers a careful analysis of the political and philosophical worries about identity and argues that these worries are neither supported by the empirical data nor grounded in realistic understandings of what identities are Mart n Alcoff develops a more realistic characterization of identity in general through combining phenomenological approaches to embodiment with hermeneutic concepts of the interpretive horizon Besides addressing the general contours of social identity Mart n Alcoff develops an account of the material infrastructure of gendered identity compares and contrasts gender identities with racialized ones and explores the experiential aspects of racial subjectivity for both whites and non whites In several chapters she looks specifically at Latino identity as well including its relationship to concepts of race the specific forms of anti Latino racism and the politics of mestizo or hybrid identity

**Tracing Silences** Ana Dragojlovic, Annemarie Samuels, 2023-06-06 Silence is crucial to our social world Responding to the growing scholarly interest in social sciences and humanities for more in depth engagements with social silence this book explores what it means to trace silences and to include traces of silences in our scholarly representations What qualifies as silence and how does it relate to articulation to voice visibility and representation How can silences be sensed and experienced viscerally as well as narratively And how do we think with and interpret silences in the face of potential unknowability Grounded in ethnographic research in the Netherlands Israel Turkey China and Indonesia the chapters all contribute to a theorization of silence that embraces multivocality unintelligibility and uncertainty of interpretation As a collection of cutting edge scholarly work at the intersection of anthropology and history Tracing Silences argues for an in depth engagement with the unspeakable and unspoken through a range of modes and methods and in the historical social and political ways in which they emerge and are enacted in the particularities of people s lives This book will be of interest to scholars and students of history anthropology sociology political science and archival studies The chapters in this book were originally published as a special issue of History and Anthropology

*Questioning Leadership* Gabriele Lakowski, Scott Eacott, Colin W. Evers, 2016-11-10 *Questioning Leadership* offers a diverse mix of cutting edge research in the field of educational leadership with contributions from expert and emerging leadership scholars It contextualises school leadership within broader social and historical contexts and traces its influence on school performance through time from its relatively modest role within a systems theory paradigm to its growing influence from the 1980s onwards as exercising leadership came to be perceived as being largely responsible for improving educational outcomes This book invites the reader to challenge the current orthodoxy of leader centrism and instead reflect more broadly on the various structural and institutional interrelationships that determine how a school functions successfully It poses challenging questions such as Is leadership really necessary for high quality school performance Can schools function effectively without leadership Is it possible to describe the work that principals do without using the word leadership How do we challenge the assumption that leadership simply exists and that it is seen as the appropriate default explanation for school performance This book does not assume that leadership is the key to organisational performance although it acknowledges the work that principals do It goes against current orthodoxy and offers varied perspectives on how leadership might be repositioned vis vis organisational and institutional structures It also suggests some new directions for leading and learning and throws open a discussion on leadership that for too long has been captured by the assumption that the leader is the cause of organisational performance and learning outcomes in schools At a time when leadership s dominance seems unshakeable this is a bold book that should appeal to postgraduate students of educational leadership and management those undertaking training in educational administration and current school leaders interested in exploring the value of leadership for educational organisations
