Handbook of Research on the Global Empowerment of Educators and Student Learning Through Action Research Slapac, Alina, Balcerzak, Phyllis, O'Brien, Kathryn, 2021-05-07 The year 2020 brought an unprecedented worldwide health crisis through the COVID 19 pandemic that has been affecting all sectors including education There were questions surrounding the effectiveness of online trainings for teachers online teaching practices the motivation and engagement of students and the quality of learning and education in these times Action research emerged to address these concerns being a systematic process of inquiry using reflection within a cyclical model of planning acting implementing evaluating and continuous reflection This method of research is employed with the expertise and passion from educators to better enhance online practices and education while using authentic learning and experiences Using collaboration social advocacy and action research there is the opportunity to advance teaching for students families and communities without a physical context involved The Handbook of Research on the Global Empowerment of Educators and Student Learning Through Action Research explores successful teaching and learning skills through the method of action research and intersects it with online learning in order to uncover best teaching practices in online platforms This book showcases educational professionals action research for solutions in advancing teaching and learning the practical benefits of action research recommendations for improving online teaching and learning and a focus on professional growth as well as social justice advocacy It highlights important topics including student learning teacher collaboration authentic learning advocacy and action research in both K 12 and higher education settings This book is ideal for inservice and preservice teachers administrators teacher educators practitioners researchers academicians and students interested in how action research is improving and advancing knowledge on the best teaching practices for online education

The Pedagogy of Physical Science David Heywood, Joan Parker, 2009-12-16 In the science classroom there are some ideas that are as difficult for young students to grasp as they are for teachers to explain Forces electricity light and basic astronomy are all examples of conceptual domains that come into this category How should a teacher teach them The authors of this monograph reject the traditional separation of subject and pedagogic knowledge They believe that to develop effective teaching for meaningful learning in science we must identify how teachers themselves interpret difficult ideas in science and in particular what supports their own learning in coming to a professional understanding of how to teach science concepts to young children To do so they analyzed trainee and practising teachers responses to engaging with difficult ideas when learning science in higher education settings The text demonstrates how professional insight emerges as teachers identify the elements that supported their understanding during their own learning In this paradigm professional awareness derives from the practitioner interrogating their own learning and identifying implications for their teaching of science The book draws on a significant body of critically analysed empirical evidence collated and documented over a five year period involving large numbers of trainee and practising teachers It concludes that it is essential to problematize subject knowledge both for learner and teacher The book s theoretical perspective draws on the field of cognitive psychology in learning In particular the role of metacognition and cognitive conflict in learning are examined and subsequently applied in a range of contexts The work offers a unique and refreshing approach in addressing the important professional dimension of supporting teacher understanding of pedagogy and critically examines assumptions in contemporary debates about constructivism in science education

Handbook of Research on Teaching in Multicultural and Multilingual Contexts Charamba, Erasmios, 2022-06-24 Several factors have resulted in increased intra and inter state migration This has led to an increase in the enrollment of students with diverse linguistics backgrounds placing more academic demands on educators Linguistic diversity presents both opportunities and challenges for educators across the educational spectrum Language ideologies profoundly shape and constrain the use of language as a resource for learning in multilingual or linguistically diverse classrooms While English has become the world language most communities remain and are becoming more and more multicultural multilingual and diverse The *Handbook of Research on Teaching in Multicultural and Multilingual Contexts* moves beyond the constraints of current language ideologies and enables the use of a wide range of resources from local semiotic repertoires It examines the phenomenon of language use language teaching multiculturalism and multilingualism in different learning areas giving practitioners a voice to spotlight their efforts in order to keep their teaching afloat in culturally and linguistically diverse situations Covering topics such as Indigenous languages multilingual deaf communities and intercultural competence this major reference work is an essential resource for educators of both K 12 and higher education pre service teachers educational psychologists linguists education administrators and policymakers government officials researchers and academicians
