In August 2001 some members of the Special Interest Group on Multimedia Protection SIGMP of the Korea Institute of Information Security and Cryptology KIISC agreed to create the IWDW. In November 2001 we set up a Program Committee and solicited papers while asking Springer Verlag to publish the proceedings of the workshop in their Lecture Notes in Computer Science series. In July 2002 we received 64 submissions from 14 countries using Microsoft's conference management site <http://cmt.research.microsoft.com/iwdw2002>. Each submission was assigned a number automatically by the conference management tool and the paper was sent to the Program Committee members for their review. We also encouraged different sets of experts to join for fair reviews.

*Globalization Development and Social Justice* Ann El Khoury, 2015-03-27

Are there existing alternatives to corporate globalization? What are the prospects for and commonalities between communities and movements such as Occupy the World Social Forum and alternative economies? Globalization Development and Social Justice advances the proposition that another globalization is not only possible but already exists. It demonstrates that there are multiple pathways towards development with social justice and argues that enabling propositional agency rather than oppositional agency such as resistance is a more effective alternative to neoliberal globalization. El Khoury develops a theory of infraglobalization that emphasizes creative constitution not just contestation of global and local processes. The book features case studies and examples of diverse economic practice and innovative emergent political forms from the Global South and North. These case studies are located in the informal social economy and community development as well as everyday practices from prefigurative politics to community cooperatives and participatory planning. This book makes an important contribution to debates about the prospects for and practices of a transformative grassroots globalization and to critical debates about globalization and development strategies. It will be of interest to students and scholars of international relations globalization social movement studies political and economic geography sociology anthropology and development studies.
