Learning That Sticks Bryan Goodwin,Tonia Gibson,Kristin Rouleau,2020-06-05 In far too many classrooms the emphasis is on instructional strategies that teachers employ rather than on what students should be doing or thinking about as part of their learning What's more students' minds are something of a mysterious black box for most teachers so when learning breaks down they're not sure what went wrong or what to do differently to help students learn It doesn't have to be this way *Learning That Sticks* helps you look inside that black box Bryan Goodwin and his coauthors unpack the cognitive science underlying research supported learning strategies so you can sequence them into experiences that challenge inspire and engage your students As a result you'll learn to teach with more intentionality understanding not just what to do but also when and why to do it By way of an easy to use six phase model of learning this book Analyzes how the brain reacts to stores and retrieves new information Helps you zoom out to understand the process of learning from beginning to end Helps you zoom in to see what's going on in students' minds during each phase Learning may be complicated but learning about learning doesn't have to be And to that end *Learning That Sticks* helps shine a light into all the black boxes in your classroom and make your practice the most powerful it can be This product is a copublication of ASCD and McREL **Instruction**

That Measures Up W. James Popham,2009-05-26 High stakes testing Mandated content standards and benchmarks Public scrutiny of student and school performance Accountability Teachers today are challenged to provide instruction that will measure up to the expectations of administrators parents and taxpayers to their own professional standards and most essentially to the needs of students Policy debates rage in the press and pedagogical pundits always have a new and better solution to offer but inside the walls of the classroom instruction boils down to teachers deciding what they want their

students to learn planning how to promote that learning implementing those plans and then determining if the plans worked And the best instructional decisions are informed by empirical research assessment evidence and the sound judgment of the professional educator In this book W James Popham calls on his half century in the classroom to provide a practical four stage framework for guiding teachers through their most important instructional decisions curriculum determination instructional design instructional monitoring and instructional evaluation Along the way he emphasizes the critical ways in which assessment can and should influence instruction advocates for a dash of curricular insurrection and offers advice for maintaining both teaching excellence and teachers sanity
