determining in relation to his environment The book then considers the development of intrinsic motivation how behaviors are motivated intrinsically how they relate to and how intrinsic motivation is extrinsically motivated behaviors affected by extrinsic rewards and controls It also considers how changes in intrinsic motivation relate to changes in attitudes how people attribute motivation to each other how the attribution process is motivated and how the process of perceiving motivation and other internal states in oneself relates to perceiving them in others

The model offers a unique and original behaviour based theory of consumer choice. In seeking to answer the question where does consumer choice take place by drawing upon behavioural psychology Foxall presents an exciting challenge to previous theories whose emphasis has been on the internal working of the consumer's mind in reaching rational decisions and choices.
