## Can TDS indicate the water quality?

**TDS** refers to Total Dissolved Solids, including all minerals such as sodium, calcium, magnesium, etc.

|               |                |
|---------------|----------------|
| Milk          | TDS: 1000~3000 |
| Milk powder   | TDS: >2000     |
| Coffee        | TDS: 150~400   |
| Mineral water | TDS: 200~500   |

TDS level does not fully indicate the quality of the water. It is improper to use TDS to measure the water filtered by this product. Only the Reverse Osmosis Filtration System can really lower TDS.

This product adopts coconut activated carbon to effectively adsorb contaminants and heavy metals while retaining beneficial minerals in the water.

## Care and safety information

→ Use cold water only. The operating temperature of this dispenser filtration system is 41~100°F/5~38°C.

→ **Do not** use with water that is microbiologically unsafe, or of unknown quality. This filter can not filter other liquids other than tap water.

→ We recommend that you store your system in the refrigerator or in a cool area that is not in direct sunlight to get refreshing great-tasting water.

→ If the filter dries out, soak it in cold tap water for 12 minutes to remove bubbles before use to activate the filter and ensure the best filtration performance.

→ If there is a lot of turbidity in tap water (such as cleaning the water tank or not using tap water for a long time), please flush it for a few minutes until the water turns clean before using.

→ If the dispenser is not going to be used in a long time, please put it in a clean container with lid. Then place it in the refrigerator which will prolong the cartridge life.

→ The filter must be protected from freezing, otherwise it might cause cracking and water leakage from the filter.
