Men, Masculinities and Disaster

Elaine Enarson, Bob Pease, 2016-06-17 In the examination of gender as a driving force in disasters too little attention has been paid to how women's or men's disaster experiences relate to the wider context of gender inequality or how gender just practice can help prevent disasters or address climate change at a structural level With a foreword from Kenneth Hewitt an afterword from Raewyn Connell and contributions from renowned international experts this book helps address the gap It explores disasters in diverse environmental hazard political and cultural contexts through original research and theoretical reflection building on the under utilized orientation of critical men's studies This body of thought not previously applied in disaster contexts explores how men gain maintain and use power to assert control over women Contributing authors examine the gender terrain of disasters through men's eyes considering how diverse forms of masculinities shape men's efforts to respond to and recover from disasters and other climate challenges The book highlights both the high costs paid by many men in disasters and the consequences of dominant masculinity practices for women and marginalized men It concludes by examining how disaster risk can be reduced through men's diverse efforts to challenge hierarchies around gender sexuality disability age and culture
