

## The Principles of Construction

Drawing using construction not only allows for solid drawing from life, but also the ability to draw from imagination. Construction is conceiving the form in terms of basic geometric shapes and it must become an instinctive part of drawing. Practice it until it becomes automatic. If you can draw a box, sphere, cylinder, and ovoid shape, you can draw any animal (or anything else for that matter). Most angles and foreshortened views can be simply broken down by using basic shapes to construct. Always remember to draw through the forms as though they were made of glass. This will help you to see through and help visualize relationships.

Basic geometric shapes like these are the tools for constructing animals.

This jaguar, coyote, and elephant are made up from a series of basic geometric shapes like the ones on the left.
