Abstract— This document gives formatting instructions for authors preparing papers for publication in the Proceedings of an IEEE conference. The authors must follow the instructions given in the document for the papers to be published. You can use this document as both an instruction set and as a template into which you can type your own text.

Keywords— Put your keywords here, keywords are separated by comma.

I. INTRODUCTION

This document is a template. An electronic copy can be downloaded from the conference website. For questions on paper guidelines, please contact the conference publications committee as indicated on the conference website. Information about final paper submission is available from the conference website.

II. PAGE LAYOUT

An easy way to comply with the conference paper formatting requirements is to use this document as a template and simply type your text into it.

A. Page Layout

Your paper must use a page size corresponding to A4 which is 210mm (8.27") wide and 297mm (11.69") long. The margins must be set as follows:

- Top = 19mm (0.75")
- Bottom = 43mm (1.69")
- Left = Right = 14.32mm (0.56")

Your paper must be in two column format with a space of 4.22mm (0.17") between columns.

III. PAGE STYLE

All paragraphs must be indented. All paragraphs must be justified, i.e. both left-justified and right-justified.

A. Text Font of Entire Document

The entire document should be in Times New Roman or Times font. Type 3 fonts must not be used. Other font types may be used if needed for special purposes.

Recommended font sizes are shown in Table I.

B. Title and Author Details

Title must be in 24 pt Regular font. Author name must be in 11 pt Regular font. Author affiliation must be in 10 pt Italic. Email address must be in 9 pt Courier Regular font.

TABLE I
Font Sizes for Papers

Font Size	Appearance (in Times New Roman or Times)		
	Regular	Bold	Italic
8	table caption (in Small Caps), figure caption, reference item		reference item (partial)
9	author email address (in Courier), cell in a table	abstract body	abstract heading (also in Bold)
10	level-1 heading (in Small Caps), paragraph		level-2 heading, level-3 heading, author affiliation
11	author name		
24	title		

All title and author details must be in single-column format and must be centered.

Every word in a title must be capitalized except for short minor words such as "a", "an", "and", "as", "at", "by", "for", "from", "if", "in", "into", "on", "or", "of", "the", "to", "with".

Author details must not show any professional title (e.g. Managing Director), any academic title (e.g. Dr.) or any membership of any professional organization (e.g. Senior Member IEEE).

To avoid confusion, the family name must be written as the last part of each author name (e.g. John A.K. Smith).

Each affiliation must include, at the very least, the name of the company and the name of the country where the author is based (e.g. Causal Productions Pty Ltd, Australia).

Email address is compulsory for the corresponding author.

C. Section Headings

No more than 3 levels of headings should be used. All headings must be in 10pt font. Every word in a heading must be capitalized except for short minor words as listed in Section III-B.

1) *Level-1 Heading*: A level-1 heading must be in Small Caps, centered and numbered using uppercase Roman

Research Impact Yannis Manolopoulos,Thanasis Vergoulis,2021-09-22 This book provides its readers with an introduction to interesting prediction and science dynamics problems in the field of Science of Science Prediction focuses on the forecasting of future performance or impact of an entity either a research article or a scientist and also the prediction of future links in collaboration networks or identifying missing links in citation networks The single chapters are written in a way that help the reader gain a detailed technical understanding of the corresponding subjects the strength and weaknesses of the state of the art approaches for each described problem and the currently open challenges While chapter 1 provides a useful contribution in the theoretical foundations of the fields of scientometrics and science of science chapters 2 4 turn the focal point to the study of factors that affect research impact and its dynamics Chapters 5 7 then focus on article level measures that quantify the current and future impact of scientific articles Next chapters 8 10 investigate subjects relevant to predicting the future impact of individual researchers Finally chapters 11 13 focus on science evolution and dynamics leveraging heterogeneous and interconnected data where the analysis of research topic trends and their evolution has always played a key role in impact prediction approaches and quantitative analyses in the field of bibliometrics Each chapter can be read independently since it includes a detailed description of the problem being investigated along with a thorough discussion and study of the respective state of the art Due to the cross disciplinary character of the Science of Science field the book may be useful to interested readers from a variety of disciplines like information science information retrieval network science informetrics scientometrics and machine learning to name a few The profiles of the readers may also be diverse ranging from researchers and professors in the respective fields to students and developers being curious about the covered subjects

Teaching and Learning in Information Retrieval Efthimis Efthimiadis,Juan M. Fernández-Luna,Juan F. Huete,Andrew MacFarlane,2011-10-06 Information Retrieval has become a very active research field in the 21st century Many from academia and industry present their innovations in the field in a wide variety of conferences and journals Companies transfer this new knowledge directly to the general public via services such as web search engines in order to improve their information seeking experience In parallel teaching IR is turning into an important aspect of IR generally not only because it is necessary to impart effective search techniques to make the most of the IR tools available but also because we must provide a good foundation for those students who will become the driving force of future IR technologies There are very few resources for teaching and learning in IR the major problem which this book is designed to solve The objective is to provide ideas and practical experience of teaching and learning IR for those whose job requires them to teach in one form or another and where delivering IR courses is a major part of their working lives In this context of providing a higher profile for teaching and learning as applied to IR the co editor of this book Efthimis Efthimiathis had maintained a leading role in teaching and learning within the domain of IR for a number of years This book represents a posthumous example of his efforts in the area as he passed away in April 2011 This book his book is dedicated to his memory

Internet of Things Ovidiu Vermesan, 2011 **AI, Machine Learning and Deep Learning** Fei Hu, Xiali Hei, 2023-06-05 Today Artificial Intelligence AI and Machine Learning Deep Learning ML DL have become the hottest areas in information technology In our society many intelligent devices rely on AI ML DL algorithms tools for smart operations Although AI ML DL algorithms and tools have been used in many internet applications and electronic devices they are also vulnerable to various attacks and threats AI parameters may be distorted by the internal attacker the DL input samples may be polluted by adversaries the ML model may be misled by changing the classification boundary among many other attacks and threats Such attacks can make AI products dangerous to use While this discussion focuses on security issues in AI ML DL based systems i e securing the intelligent systems themselves AI ML DL models and algorithms can actually also be used for cyber security i e the use of AI to achieve security Since AI ML DL security is a newly emergent field many researchers and industry professionals cannot yet obtain a detailed comprehensive understanding of this area This book aims to provide a complete picture of the challenges and solutions to related security issues in various applications It explains how different attacks can occur in advanced AI tools and the challenges of overcoming those attacks Then the book describes many sets of promising solutions to achieve AI security and privacy The features of this book have seven aspects This is the first book to explain various practical attacks and countermeasures to AI systems Both quantitative math models and practical security implementations are provided It covers both securing the AI system itself and using AI to achieve security It covers all the advanced AI attacks and threats with detailed attack models It provides multiple solution spaces to the security and privacy issues in AI tools The differences among ML and DL security and privacy issues are explained Many practical security applications are covered

Web Information Retrieval Stefano Ceri, Alessandro Bozzon, Marco

Brambilla, Emanuele Della Valle, Piero Fraternali, Silvia Quarteroni, 2013-08-30 With the proliferation of huge amounts of heterogeneous data on the Web the importance of information retrieval IR has grown considerably over the last few years Big players in the computer industry such as Google Microsoft and Yahoo are the primary contributors of technology for fast access to Web based information and searching capabilities are now integrated into most information systems ranging from business management software and customer relationship systems to social networks and mobile phone applications Ceri and his co authors aim at taking their readers from the foundations of modern information retrieval to the most advanced challenges of Web IR To this end their book is divided into three parts The first part addresses the principles of IR and provides a systematic and compact description of basic information retrieval techniques including binary vector space and probabilistic models as well as natural language search processing before focusing on its application to the Web Part two addresses the foundational aspects of Web IR by discussing the general architecture of search engines with a focus on the crawling and indexing processes describing link analysis methods specifically Page Rank and HITS addressing recommendation and diversification and finally presenting advertising in search the main source of revenues for search engines The third and final part describes advanced aspects of Web search each chapter providing a self contained up to date survey on current Web research directions Topics in this part include meta search and multi domain search semantic search search in the context of multimedia data and crowd search The book is ideally suited to courses on information retrieval as it covers all Web independent foundational aspects Its presentation is self contained and does not require prior background knowledge It can also be used in the context of classic courses on data management allowing the instructor to cover both structured and unstructured data in various formats Its classroom use is facilitated by a set of slides which can be downloaded from www.search.computing.org
