Web Service User Manual:

Architecting Web Services William Oellermann, 2001-09-01 Architecting Web Services is targeted toward developers and technical architects who have heard about and even started to work with Web services. The book starts with a background on the evolution of Web services and their significance to future collaborative efforts via the Internet. It then reveals the architecture for Web services and the various relationships that can be established through their consumption. Following a short technical primer on XML and related technologies, the Web services model is outlined to illustrate the decisions that have to be made in the areas of presentation interface and security before the design is even started. Topics ranging from content to state management to system infrastructures are discussed to help you understand the options and the pitfalls when developing robust Web services. The life cycle of implementing Web services from start to finish is illustrated, taking existing processes and exposing their functionality through Web services. Examples extend both Java and COM objects as Web services before exposing an entire hotel reservation system through a Web services workflow. These exercises are followed by three application scenarios that consume these Web services again with both Java and Visual Basic ASP examples. Discussions cover the design, implementation, and testing of each solution to ensure a successful result. Finally, the book takes a look ahead at the future of Web services by examining both the current strategies of the primary vendors and the standards initiatives that are presently under way. A companion website provides all the source code and hosts the Web services and sample applications introduced in the book.

Web Services – ICWS 2023 Yuchao Zhang, Liang-Jie Zhang, 2023-09-27 This book constitutes the proceedings of the 30th International Conference on Web Services ICWS 2023 held as Part of the Services Conference Federation SCF 2023 held in Honolulu HI USA in September 2023. The 7 full papers and one short paper presented in this volume were carefully reviewed and selected from 14 submissions. The papers cover topics in the field of research track, application and industry track, and short paper track. The International Conference on Web Services ICWS has been a prime international forum for both researchers and industry practitioners to exchange the latest fundamental advances in the state of the art and practice of Web-based services, identify emerging research topics, and define the future of Web-based services. All topics regarding Internet Web services lifecycle study and management align with the theme of ICWS.
