Torture and Its Definition In International Law Professor Metin Baso?lu, 2017-08-15 This book presents an interdisciplinary approach to definition of torture by bringing together behavioral science and international law perspectives on torture. It is a collaborative effort by a group of prominent scholars of behavioral sciences, international law, human rights, and public health with internationally recognized expertise and authority in their field. It represents a first ever attempt to explore the scientific basis of legal understanding of torture and inform international law on various definitional issues by proposing a sound theory and empirical evidence based psychological formulation of torture. Drawing on scientific evidence from the editor's 30 years of systematic research on torture, it proposes a learning theory formulation of torture based on the concept of helplessness under the control of others and offers an assessment methodology that can reduce the element of subjectivity in legal judgments in individual cases. It also demonstrates how this formulation can help understand the nature and severity of ill treatments in different contexts such as domestic violence and adverse conditions of penal confinement. Through a learning theory analysis of enhanced interrogation techniques, it demonstrates not only why these techniques constitute torture but also how they help us understand the contextual defining characteristic of torture in general. The proposed formulation implies a broader concept of torture than previously understood, provides scientific and moral justification for the evolving trends in international law towards a broader coverage of ill treatments in contexts beyond official custody, and points to new directions of expansion of the concept. With a focus on the concepts of shame and humiliation and their evolutionary origin, the book explains why inhuman or degrading treatments can cause as much pain or suffering as physical torture. Although treatment issues are not covered, the book sheds light on potentially effective treatment approaches by offering important insights into psychology of torture.

The Battle for British Islam Sara Khan, Tony McMahon, 2016-08-23 Across Britain, Muslims are caught up in a battle over the very nature of their faith. And extremists appear to be gaining the upper hand. Sara Khan has spent the past decade campaigning for tolerance and equal rights within Muslim communities and is now engaged in a new struggle for justice and understanding the urgent need to counter Islamist inspired extremism. In this timely and courageous book, Khan shows how previously antagonistic groups of fundamentalist Muslims have joined forces, creating pressures that British society has never before encountered. What is more, identity politics and the attitudes of both the far Right and ultra Left have combined to give the Islamists ever increasing power to spread their message. Unafraid to tackle some of the pressing issues of our time, Sara Khan addresses the question of how to break the cycle of extremism without alienating British Muslims. She calls for all Britons to reject divisive ideologies and introduces us to those individuals who are striving to build a safer future.
