**Applying Translation Theory to Musicological Research** Malgorzata Grajter,2024-05-26 This monograph lays the foundation for new methodologies of research between music and translation It is the first such holistic attempt from the perspective of a musicologist based on the adaptation of translation theories Until now these fields have remained underexplored together

Only recently have the tools developed by translation theory permeated into musical scholarship. Such tools should prove as a promising alternative to those offered by classic musicological studies particularly in reference to musical arrangement, pop music covers and performance. Theoretical discussion on topics are supported by case studies. This text appeals to musicologists and musicians as well as experts in the field of translation theory who are interested in expanding their field of inquiry.

**Jazz Arranging and Composing** Bill Dobbins, 1986 Bill Dobbins new book *Jazz Arranging and Composing a Linear Approach* is a welcome and greatly needed addition to jazz educational literature. It is the first book to provide a clear and logical bridge from the more basic technics of arranging and melody harmonisation to the more advanced linear methods employed by some of the most interesting and influential jazz arrangers and composers. The musical examples and scores are well organized and the analysis is clear and accessible. I have long known Bill's unique abilities as a gifted pianist and composer and I highly recommend this most recent contribution to jazz writers at all levels of experience.

Percussionists Stephen L. Barnhart, 2000-03-30 Alphabetically arranged entries summarize the professional careers of over 500 percussionists from various musical venues. Due to the shrinking global village ethnic percussion was rediscovered and incorporated into the concert hall. Since percussion transcends all musical styles it often is featured center stage as a solo or ensemble in heterogeneous musical settings. These excerpts represent percussionists who spent the majority of their lives performing as collaborative or solo artists or working as inventors or manufacturers of percussion instruments. Where applicable select discographies, bibliographies and videographies accompany the entries. This detailed reference will appeal to professional percussionists, instructors and percussion historians. Data has been compiled from numerous disparate sources and entries are cross referenced. Individual bibliographies include articles by or about the person and a general bibliography lists broader reference works. Discographies and videographies reflect samples of an artist's work. Select photographs complement the text.
