**TRIZ - Systematic Innovation in Business & Management** Yeoh Teong San,2014-10-01 TRIZ Theory of Inventive

Problem Solving is a powerful methodology which is able to improve a company's top line and bottom line. The top line refers to a company's gross sales or revenues, whereas the bottom line is a company's net earnings or net profits. The uniqueness of TRIZ is its ability to provide a structured and systematic approach coupled with a suite of tools to enhance both top line and bottom line results. TRIZ can be used for creating new products to generate sales or making processes more efficient and effective to reduce operating costs and expenses. TRIZ also enhances management capabilities by transforming a good manager to a great manager by acquiring tools to recognize contradictions when they arise and solve them without compromise. In summary, TRIZ is a philosophy, process, and suite of tools. A total of 11 TRIZ tools: Function Analysis, Cause and Effect, Identify Unique Value Propositions for new products or services, circumvent patents of competitors, and solve age-old or chronic problems in both business and management fields.

**Co-design and Social Innovation** Garth Britton, 2017-04-21 Although co design has been practised in new service and product development for some years it has only recently begun to appear in the burgeoning field of social innovation. It appears to be well attuned to this new context offering as it does an open ended relational process to generate novel solutions to problems whose very definition seems to escape more conventional approaches. However even less research attention has been paid to co design than to social innovation. This book explores the potential of co design as a social innovation process. It reviews the diverse theoretical and disciplinary foundations on which co design is based. It proposes a framework for understanding co design as a cohesive practice across the extremely broad scope of its potential applications. It explores appropriate approaches to governance and evaluation of co design initiatives and outlines the key issues and limitations on its use. Although it is intended to provide a robust theoretical basis for researching co design initiatives it will also be of interest to anyone who is contemplating putting co design into practice.
