injustice and extinction As a remedy Freeman believes social movements should collectively foster a cultural shift in human identity away from an egoistic anthropocentrism human centered outlook and toward a universal altruism species centered ethic so people may begin to see themselves more broadly as human animal earthlings To formulate the basis for this identity shift Freeman examines overlapping values supporting life fairness responsibility and unity that are common in global rights declarations and in the current campaign messages of sixteen global social movement organizations that work on human civil rights nonhuman animal protection and or environmental issues such as Amnesty International Human Rights Watch CARE People for the Ethical Treatment of Animals the World Wildlife Fund the Sea Shepherd Conservation Society the Nature Conservancy the Rainforest Action Network and Greenpeace She also interviews the leaders of these advocacy groups to gain their insights on how human and nonhuman protection causes can become allies by engaging common opponents and activating shared values and goals on issues such as the climate crisis enslavement extinction pollution inequality destructive farming and fishing and threats to democracy Freeman s analysis of activist discourse considers ethical ideologies on behalf of social justice animal rights and environmentalism using animal rights respect for sentient individuals as a bridge connecting human rights to a more holistic valuing of species and ecological systems Ultimately Freeman uses her findings to recommend a set of universal values around which all social movements campaign messages can collectively cultivate respectful relations between human animal earthlings fellow sentient beings and the natural world we share

noses of cows tell us how they're feeling. At times we humans translate that knowledge into compassion for other animals. Think of the public outcry against the fates of Cecil the lion or the captive gorilla Harambe. But on the whole, our growing understanding of what animals feel is not resulting in more respectful treatment of them. Renowned animal behavior expert Marc Bekoff and leading bioethicist Jessica Pierce explore the real world experiences of five categories of animals, beginning with those who suffer the greatest deprivations of freedoms and choice: chickens, pigs, and cows in industrial food systems, as well as animals used in testing and research, including mice, rats, cats, dogs, and chimpanzees. Next, Bekoff and Pierce consider animals for whom losses of freedoms are more ambiguous and controversial, namely individuals held in zoos and aquaria, and those kept as companions. Finally, they reveal the unexpected ways in which the freedoms of animals in the wild are constrained by human activities and argue for a more compassionate approach to conservation. In each case, scientific studies combine with stories of individual animals to bring readers face to face with the wonder of our fellow beings, as well as the suffering they endure, and the major paradigm shift that is needed to truly ensure their well-being. **The Animals Agenda** will educate and inspire people to rethink how we affect other animals and how we can evolve toward more peaceful and less violent ways of interacting with our animal kin in an increasingly human-dominated world. **What Animals Want**

Jacqueline Pearce, 2021-10-12. All animals need food, water, and shelter. But what about their social and emotional needs? Modern science tells us that animals experience a wide range of emotions, from fear and anxiety to friendship and happiness. **What Animals Want** is an animal care book with a difference. It introduces young readers to the Five Freedoms and helps them think about their pets' physical and emotional needs, providing a framework for thinking about the welfare of all animals in human care, including farm, exotic, and wild animals. Author Jacqueline Pearce wrote this book in consultation with the British Columbia Society for the Prevention of Cruelty to Animals (BC SPCA), an organization internationally recognized for its innovative humane education and animal welfare work. **The Ethics of Captivity** Lori Gruen, 2014. In the United States, roughly 2 million people are incarcerated; billions of animals are held captive and then killed in the food industry every year; hundreds of thousands of animals are kept in laboratories; thousands are in zoos and aquaria; millions of pets are captive in our homes. Surprisingly, despite the rich ethical questions it raises, very little philosophical attention has been paid to questions raised by captivity. Though conditions of captivity vary widely for humans and for other animals, there are common ethical themes that imprisonment raises, including the value of liberty, the nature of autonomy, the meaning of dignity, and the impact of routine confinement on physical and psychological well-being. This volume brings together scholars, scientists, and sanctuary workers to address, in fifteen new essays, the ethical issues captivity raises. Section One contains chapters written by those with expert knowledge about particular conditions of captivity and includes discussion of how captivity is experienced by dogs, whales, and dolphins, elephants, chimpanzees, rabbits, formerly farmed animals, and human prisoners. Section Two contains chapters by philosophers and social theorists that reflect on the social, political, and ethical issues raised

by captivity including discussions about confinement domestication captive breeding for conservation the work of moral repair dignity and an ethics of sight and the role that coercion plays *The Pornography of Meat: New and Updated Edition* Carol J.
